Items shown are in BOLD characters

Dear Friends & Rescuers:

Another year has passed with major accomplishments here at RescueTECH. We have just completed a 900 sq ft. expansion of floor space to our warehouse. This allows us to more efficiently store the ever-increasing number of products that we manufacture and distribute.

In December 2007 we successfully completed our annual audit to ISO9001-2000. Now certified by SGS, RescueTECH continues to provide the highest quality service and products to Technical Rescuers.

Look at our new items, highlighted in the listing above, for more innovative products from RescueTECH. We continue to be proud of our alliances with many top international equipment manufacturers such as Ruth Lee, Con-Space, and International Safety Components. Through these partnerships, rescuers can expect the highest quality from their rescue products.

We look forward to serving you in this year and for years to come!

Glenn Newell, President / Owner
and Staff of Rescue Technology

RescueTECH ACCESS™ Lifeline

A New Era Begins...

RescueTECH spent 35 years helping design some of the best known rescue ropes in the world. Now, we have used our knowledge to create a rope design that gives the best combination of all desired characteristics. By building the ropes from the "ground up", we are able to provide a super-strong rope with low stretch and excellent flexibility and knotability. Our ropes actually handle better after 6 months of use than some new ropes from other manufacturers. We specifically address the issue of sheath slippage when constructing all of our top quality Rescue Ropes. Solution dyed color insures that colors won't run. All ropes of the same diameter will perform identically, making multi-rope systems much easier to control. Certified to NFPA 1983 and EN1891. Available in 11 color combinations.

RescueTECH NFPA Life Safety Ropes

ACCESS LIFELINE™ - STRIPES

Stock Number	Diameter in. mm	Color/Stripe	NFPA Tensile Strength* lbf. kN	WLL** (lbs.)	NFPA Rating	Wgt / 100 ft (lbs.)	Price per ft.

5/8" x 600'	840.00

To create the part number substitute the length for the 'xxx'.

TECHNote™

Stripes vs. Solids

Different colors are very useful in distinguishing particular ropes during a rescue or training operation. The addition of stripes to ropes offers the rescuer the ability to see the movement of the rope. When two striped ropes are used side-by-side, the stripes act as index marks. If the stripes on the two ropes are not moving in relationship to each other, then the ropes are travelling at the same speed.

RescueTECH NFPA Life Safety Ropes

**WLL - Recommended Working Load (also known as Safe Working Load) is calculated using the NFPA 15:1 Safe Working Load Ratio.

What to look for in Life Safety Ropes

QUALITY - RescueTECH operates under a quality control program that meets stringent ISO 9000 guidelines. We are certified to ISO-9001:2000 by SGS U.S. Testing Company, Inc., a leading independent international certifying organization. Also, most of the suppliers we work with, are certified to the ISO 9000 Standard. The ISO Standard ensures that our Quality Control and Quality Assurance programs meet stringent international guidelines.

CONSTRUCTION - 100% permanent solution dyed color in the polyester sheath with contrasting marker stripe. Superior flexibility, knotability and excellent resistance to abrasion that is up to four times greater than other kernmantle ropes.

CONSISTENCY - All ropes, in comparable sizes, have identical handling and performance characteristics. This is ideal for rescues requiring multiple ropes of different colors. RescueTECH ropes are designed to provide consistent performance throughout the life of the Lifeline.

CERTIFICATION - ALL RescueTECH General Use Lifelines, Personal Use Lifelines, and Escape Ropes meet or exceed current NFPA 1983 standards for construction, marking, and third party independent certification.

ECONOMY - The RescueTECH Rope's optimum blend of strength, flexibility, abrasion resistance, and load absorption creates the best rope for today's rescuers.

5mm TECH Cord

Tech Cord's small diameter and 5,000 pound strength are a result of using a unidirectional core of 100% Technora fibers and a tightly woven polyester sheath. Tech Cord is extremely strong and lightweight. Colors: Green Mix, Solid Black. Strength: 5,000 lbf.

23910500	Tech Cord x ft.	1.35
23910550	Tech Cord x 50 ft.	68.50
23910566	Tech Cord x 660 ft.	800.00

WARNING

Technical rescue and safety is potentially hazardous. Any person using equipment sold by RESCUE TECHNOLOGY in any manner is personally responsible for learning the proper techniques involved, and assumes all risks and accepts full and complete responsibility for any and all damages or injury of any kind, including death, which may result from the use of any RESCUE TECHNOLOGY equipment.

RescueTECH Prusik Cords

Prusik cords with the same high quality and long wear design as our Rescue Ropes. Size selection should be based upon diameter of main line. Flexible cord that is both strong and highly resistant to abrasion, only one style of small diameter cord is produced. Available by the foot or in Spool Lengths: 6mm x 330 ft.; 7mm / 8mm/ 9mm x 200 ft.

	Diameter	Strength	Colors	Main Line	per ft.	Spool
5096000	6mm	1650 lbf.	Black, Blue Mix, Red Mix	7/16 - 1/2"	0.35	105.00
5097000	7mm	2300 lbf.	Black, Teal Mix, Gold Mix	1/2 - 5/8"	0.43	86.00
5098000	8mm	2900 lbf.	Black, Red Mix, Yellow Mix	1/2 - 5/8"	0.52	104.00
5099000	9mm	3670 lbf.	Blue Mix, Yellow Mix	5/8"	0.63	126.00

5/8" Hoisting Line

100% Multifilament polypropylene for a myriad of utility use. Ideal for hoisting equipment. Soft, supple, easy to grip. Strength: 4,000 lbf. WLL: 400 lbs. Diameter: 5/8". Color: Black.

230319001	Hoisting Line x ft.	0.46
230319101	Hoisting Line x 100'	46.00
230319501	Hoisting Line x 500'	228.00

NOT FOR LIFE SAFETY USE.

WARNING

Technical rescue and safety is potentially hazardous. Any person using equipment sold by RESCUE TECHNOLOGY in any manner is personally responsible for learning the proper techniques involved, and assumes all risks and accepts full and complete responsibility for any and all damages or injury of any kind, including death, which may result from the use of any RESCUE TECHNOLOGY equipment.

TECHNote™

Prusik Cord vs. Accessory Cord

What is the difference between prusik Cord and accessory cord? Generally there is no difference. The key is being able to provide a cord that has specifications and characteristics that meets the needs of the rescuer.

RescueTECH Sewn Prusik

Our Product Development Department has worked hard to provide a durable Pre-Sewn 8mm prusik for use in rescue systems. Our heavy duty stitching uses thread that is 150% thicker/stronger than other brands. Since not all PMP's are equally sized, we have created 2 sizes of Short Prusiks to work with the Long Prusik. Testing shows that a single RescueTECH Sewn Prusik pulled on RescueTECH's ACCESS 1/2" Lifeline starts "clutching/slipping at a strength of 3,000 lbf*. When pulled end-to-end the single loop strength exceeds 4,500 lbs. Marked with durable labeling to help product identification.

751180162	16" for 2" PMP (Yellow)	7.00
751180182	18" for 2.5" - 3" PMP (Yellow)	7.00
751180224	22" Prusik (Red)	7.50

* Results may vary depending upon brand and condition/age of the main rope.

TECHNote™

Sheath Thickness Diagram
approximates actual sheath/core ratios.

Number of Sheath Strands

The fewer strands that it takes to build the sheath means the sheath will be thicker and take longer to abrade. 16 strand sheath construction is effectively twice the thickness of the 32 strand sheaths and three times the thickness of 48 strand sheaths used in other static ropes. The key issue is whether the rope is able to maintain its handling characteristics. A 48 carrier braid may be smooth. But it is a relatively thin sheath and may not tie as easily as a 32 carrier sheath.

RescueTECH Industrial Lifeline

High Strength Swaged Eye

NFPA Life Safety ropes with a loop permanently swaged in the end. Kernmantle rope lasts an average of 6 times longer than twisted ropes. Swaging provides a high strength, permanent eye without the hassles of knots. Our testing shows that the loop strength in swaged ropes exceeds 90% of the NFPA required rope strength. Swaged ropes are complete with a protective thimble in the eye. 1/2" Lifeline WLL: 600 lbs. 7/16" Lifeline WLL: 300 lbs. Color: Orange or Blue. **USE ONLY WITH ROPE GRABS DESIGNED FOR 1/2" KERNMANTLE ROPE.**

1/2" Lifeline		Weight		7/16" Lifeline		Weight	
598811050XX*	50 ft.	4.75 lbs.	83.00	5987111000R*	100 ft.	6.25 lbs.	120.00
598811075XX*	75 ft.	6.75 lbs.	112.00	5987111500R*	150 ft.	9.3 lbs.	170.00
598811100XX*	100 ft.	8.75 lbs.	145.00	5987112000R*	200 ft.	12.9 lbs.	225.00
598811150XX*	150 ft.	12.50 lbs.	215.00				
598811200XX*	200 ft.	16.75 lbs.	280.00				

**Replace XX with "OR"(Orange) or BL (Blue)

Meets OSHA/ANSI Requirements for Vertical Lifeline. NFPA General Use Rope. Complies with NFPA 1983. Specify NFPA Labeling Requirements when ordering.

RescueTECH Dynamic Rope

Highest Quality / Load Absorption

A dynamic rescue rope manufactured for special applications when climbing above the rigging point. Superior construction with the highest quality standards. High fall rating, low impact loads, increased resistance to abrasion. Exceeds current UIAA and CE standards for dynamic ropes. Strength: 5,500 lbf. EN 892.

Stock Number	Dia. (mm)	Description	Length (ft.)	Length (meters)	UIAA Tested As	Weight / meter (gm)	UIAA Falls Survived	Max Impact Load (kN)	80 kg Elong (%)
5952165AM	11	Amber Mix	165	50	Single	75.2	14	9.62	4.8
5952165GR	11	Green Mix	165	50	Single	75.2	14	9.62	4.8

TECHNote™

ROPE END TERMINATION

The swaged end termination was developed after many years of research and development. Our process presses the entire length of the aluminum ferrule rather than multiple 5/16" rings along its length. The swaged termination grips the rope along the whole length of the swage to give excellent holding power and increase the user's ability to inspect the rope. This type of termination retains well over 90% of the NFPA required rope tensile strength. Our testing shows that nylon fibers stretch as a rope is loaded. This stretch causes a decrease in rope diameter that needs continuous contact to help compensate for this reduction and retain the rope's strength.

RescueTECH

Confined Space Retrieval Line

With Forged Double Locking Snap

A retrieval line that interfaces with rope rescue systems. Our proprietary process creates a loop that exceeds the strength of a Figure 8 on a bight. The custom pressing die minimizes sharp edges often found on other swaged fittings. Manufactured from 1/2" NFPA rescue rope and forged double locking snaps. The nylon retrieval line meets the NFPA General Use Rope Standards and the ANSI Z-359.1 Retrieval Line Standards. WLL: 600 lbs. Rope Colors: Orange, Blue. **USE ONLY WITH ROPE GRABS DESIGNED FOR 1/2" KERNMANTLE ROPE.**

		Weight	
5988131000R*	100' (Orange)	9 lbs.	155.00
598813100BL*	100' (Blue)	9 lbs.	155.00
5988131500R*	150' (Orange)	12.75 lbs.	225.00
598813150BL*	150' (Blue)	12.75 lbs.	225.00

* Rope Certified NFPA 1983 compliant by UL. Meets Lifeline requirements for ANSI Z359.1, Retrieval Line requirement for OSHA 1910.146, and General Use Life Safety Rope Requirement for NFPA 1983.

RescueTECH Double End Industrial Lifeline

High Strength Swaged Eye

1/2" NFPA Rescue Rope with swaged loops on each end. Color: Orange. WLL: 600 lbs. **USE ONLY WITH ROPE GRABS DESIGNED FOR 1/2" KERNMANTLE ROPE.**

	Weight	
5988120750R*	75 ft.	7 lbs. 135.00
5988121500R*	150 ft.	12.75 lbs. 225.00

RescueTECH Rope Cleanser

Reformulated to clean ropes better. Excellent for nylon, polyester, or polypropylene fibers. Excellent cleanser for Harnesses, Slings, and other webbing / fabric products. Concentrated formula can be diluted to suit the dirt or stain encountered. Biodegradable.

599911	1 pint	9.00
599910	Concentrate for One Gallon	20.00

Rope Washer

Device connects to standard hose for washing or rinsing ropes. Best on light dirt or for rinsing washed ropes.

5999203	Standard (up to 1/2")	6.1 oz.	36.50
5999204	Large (up to 3/4")	8.6 oz.	36.50

Mesh Wash Sack

Great for rope washing, packaging slings, webbing, cords, and personal gear.

805401	Large	15" x 20"	6.25
805406	XLarge	24" x 30"	12.00

Whip-End-Dip

Liquid vinyl compound that seals the end of your rope. Prevents fraying and unravelling. Also, needed information can be marked on an adhesive label then coated with Whip-End-Dip to protect markings. Contents: 4 oz.

599900	White	8.25
599904	Red	8.25
599909	Clear	8.25

Dobi Rope Brush

Rope washing the easy way. Just put the rope inside the rope washer, add mild soap and water, and work the Dobi back and forth along the rope. The revolving bristles help to gently remove grime, dirt, and metal oxides from rope. Weight: 3.2 oz.

5999211	Dobi Rope Brush	31.00
---------	-----------------	-------

RescueTECH Rope Marking Labels

Self-laminating marking labels. Write or type information on the 1" x 3/4" label and wrap the clear laminating plastic over the white label. Suitable for ropes up to 5/8". The label can then be sealed to the rope with clear Whip-End-Dip. One book contains 60 labels. Weight: 1.2 oz.

5999223	Rope Marking Labels	25.00
---------	---------------------	-------

RescueTECH Equipment I.D. Tape

Used to identify ropes, carabiners, and other equipment. Can be sealed on ropes using Whip-End-Dip or Heat Shrink Tubing. Set includes 5 colors of vinyl tape. Colors: yellow, white, Red, Green, Blue.

599930	Equipment I.D. Tape	7.50
--------	---------------------	------

TECHNote™ WORKING LOAD LIMIT

Working Load Limit (also known as Safe Working Load or Recommended Working Load) is defined as the maximum load that may routinely be applied to an assembly or component in straight tension. The other strength term is Ultimate Strength (or Tensile Strength). Ultimate Strength is the load at which a component or assembly will fail in a test.

We have chosen to use the NFPA ratio of 15:1 for ropes and the American engineering standard of 10:1 for critical use hardware and auxiliary equipment. We realize that these ratios may exceed proposed standards, but have selected them because they best apply to the rescue community.

We show the Working Load Limit (WLL) because the Ultimate Strength may change during the life of the product. Whereas, the WLL remains valid during the normal life of the product. For example, a 9,000 lbf. rope will lose strength as it is used. The WLL will remain 600 lbs. throughout the normal service life of the rope.

Additionally, rescue products should be chosen and matched based upon their WLL. The item with the lowest WLL limits the system working load limit. Remember, a chain is only as strong as its weakest link.

901030	Rope Measurer	225.00
901035	Wall Mounting Bracket	34.00
901036	Table Mounting Bracket	7.00

901020	Cutting Box	120.00
901025	Replacement Blade, Box	19.00

901010	Cutting Gun	50.00
901015	Replacement Blade, Gun	6.50

Paint Marking Pens

Heat Shrink Tubing

599944	For 3/8" & 7/16"	0.47
599945	For 7/16" & 1/2"	0.75
599946	For 5/8" & 3/4"	0.85

RescueTECH Multi-Unit Edge Roller

Webbing Linkage

Our original M.U.E.R. now links with a length of webbing. Webbing linkage allows the unit to be used to provide large area protection. Units may be linked together. Low Profile design. All units 5.75" wide.

		Units	
611213	Medium	3	208.00
611214	Long	4	278.00

Left: Wide Rope Pad Right: Narrow Rope Pad with Velcro

RescueTECH Rope Pad Super-Heavyweight Cotton Duck

Large 100% cotton rope pads are 2 layers thick in the center and use no synthetic material on its protective surface. Narrow pad with velcro will wrap around rope - secures with hook and loop fastener. Wide pad provides large area coverage. Both pads come complete with rigging grommets for tie-back cords. Color: Natural.

		Dimensions	
612101	Narrow	36 x 12"	21.00
612100	Narrow w/ Velcro	36 x 12"	27.00
612105	Wide	36 x 30"	24.00
612110	Extra Long	36 x 60"	34.00

RescueTECH Multi-Unit Edge Roller Rapid LinkConnectors

An all-new edge protection device from RescueTECH. Featuring an alloy aluminum frame and rollers, this unit may be used as a single unit or paired-up with other units to provide large area protection using included rapid link. Low Profile design. All units 5.75" wide.

			Units	Length	
a.	611111	XSmall	1	8.25"	90.00
b.	611112	Small	2	17.75"	150.00
c.	611113	Medium	3	26.50"	210.00
	611114	Long	4	35.25"	285.00
	60510106	Connector Link			2.20

RescueTECH Rope Guard Super H.D. Cotton Duck Liner

Special protective sleeve made with multiple layers of super heavy cotton canvas. Outside of Rope Guard covered with heavy weight PVC fabric to protect from hazards and to provide distinctive color. Designed to protect ropes from abrasion when stretched across rough surfaces encountered in rappelling, rescue, high rise building maintenance, and other operations. Webbing loops are attached at each end to provide tie-backs to secure rope guard. Specify color: Black, Red.

		Length	
612412X	Small	12"	15.25
612418X	Medium	18"	17.00
612424X	Large	24"	19.00
612436X	XLarge	36"	23.00

RescueTECH One Piece Edge Roller Single Unit Edge / Roof Roller

Fully protects rope from corners and other points of friction. Uses aluminum rollers mounted on Oilite® bushings for extended wear. Alloy aluminum construction, steel fittings. Lightweight and low profile. Four connecting points for easy attachment and linking units together. Works best on 90 degree corners like window ledges or parapet walls. Can also be used as small diameter hose roller. Tensile Strength: 10,000 lbf. Dimensions: 5" x 9". Weight: 30 oz. Color: Gold. Rating: General Use.

611101	One Piece Edge Roller	110.00
--------	-----------------------	--------

Exceeds NFPA 1983/ANSI/OSHA strength specifications.

Locking

Non-Locking
rope not included

Rope Management Roller

Unique Multi-Roller Design

Edge roller protects your rope from abrading over sharp edges. Multiple sections allow unit to conform to almost any surface. Sections will "lock" into a shape using the twist-lock handles. The rollers ability to conform to a shape and then lock allows the unit to better hold the surface. Ideal for bridges and parapet walls.

		Length	Weight	
611117	Locking, 5 sections	19.5"	58.2 oz.	260.00
611118	Non-Locking, 3 section	15.75'	31.2 oz.	130.00

Nylon Stuff Sack

Lightweight bags to stow small parts, equipment and personal gear. Manufactured of 200 den pack cloth with drawstring closure. Close with spring-loaded cordlock. Color: Blue

805216	Small	10.5" x 4.5"	6.75
805316	Medium	12.5" x 5"	8.00

All Terrain Edge Protector (A.T.E.P.)

High Stability Flexible Edge Protector

Low profile (2.23") allows litter to be easily raised over unit. Aluminum shafts protect on all types of edges such as 90 degree building edges, boulders, structural steel. Two units can be linked together to protect longer lengths. Standard 22" unit is longer than three connected units of other manufacturers. Standard unit folds to 7" cube for easy storage. Sideplates manufactured of alloy aluminum.

	Dimensions	Weight	Rating	
611010	A.T.E.P., Standard	22" x 6" x 2 1/4"	38 oz.	General 210.00
611011	A.T.E.P., Long	30" x 6" x 2 1/4"	50 oz.	General 285.00

Exceeds NFPA 1983/ANSI/OSHA strength specifications.
U.S. Patent # 4,869,466

Mesh Stuff Sack

This unique and versatile stuff sack has all of the advantages of a mesh bag with the durability of a nylon bag. Great for organizing gear or storing anything that you need to see.

RescueTECH Rope Bags

Super-Durable Construction

Constructed of heavy duty water resistant Cordura™ nylon and nearly-indestructible Ballistic Nylon fabrics. Side seams of bags are double-stitched so that no fabric edges are exposed for fraying. Bottom seam is double stitched and webbing reinforced for superior strength and resistance to abrasion. Drawstring closure with cord lock. Accommodates rope (capacities listed) or equipment. All units except personal size have log book pouches and grommets in bottom to permit drainage. Handles connected to interior of bag. Specify color.

EGRESS+Plus™ Personal Escape Rope 100% Technora Fire Resistant

Superstrong, 100% Technora construction provides both sheath and core resistance to fire and heat. Diameter: 7.5mm Heat Resistance: >900° Strength: 4,000 lbf.

52628000	EGRESS+Plus™ P.E.R. x ft.	1.61
52628025	EGRESS+Plus™ P.E.R. x 25'	41.00
52628035	EGRESS+Plus™ P.E.R. x 35'	56.00
52628050	EGRESS+Plus™ P.E.R. x 50'	81.00
52628075	EGRESS+Plus™ P.E.R. x 75'	112.75
52628100	EGRESS+Plus™ P.E.R. x 100'	161.00

Precut lengths are finished with a special sealant to prevent unravelling.

EGRESS™ Personal Escape Rope 100% Technora Sheath with Nylon Core

A new Fire Resistant Personal Escape Rope (P.E.R.) from RescueTECH™. We redesigned our original Escapeline to provide lighter weight and greater versatility. This tough 7.5mm rope has a strength of 5,200 lbf. Perfect for your high temperature escape line needs. *Precut lengths are finished with a special sealant to prevent unravelling.*

52618000	EGRESS™ P.E.R. x ft.	1.12
52618025	EGRESS™ P.E.R. x 25'	28.00
52618035	EGRESS™ P.E.R. x 35'	39.50
52618050	EGRESS™ P.E.R. x 50'	56.00
52618070	EGRESS™ P.E.R. x 70'	78.50
52618100	EGRESS™ P.E.R. x 100'	112.00

Warning: Small diameter cords do not provide the same amount of rappelling friction as do larger ropes. Rescuers should practice rappelling with an 8mm cord to become familiar with the 8mm diameter lines. NFPA 1983 states that Personal Escape Ropes are for single use only. *Specifications provided by E.I. DuPont De Nemours Co.

EGRESS-Hybrid™ Personal Escape Rope

New Aramid / Polyester Technology

The 7.5mm EGRESS-Hybrid™ rope is a blend of aramid and polyester fibers. The tough, fire-resistant aramid fibers in the sheath give the rope its strength and durability. While the polyester fibers lighten the weight and provide greater visibility. The end result is a strong, heat resistant cord that is lighter in weight and more economical than PER made from 100% aramid fibers. Strength: 4,000 lbf.

50 ft. Kit

100 ft. Kit

EGRESS-N™ Kits

A non-aramid version of our popular EGRESS Kits. Assembled using our EGRESS-N Nylon/Polyester™ NFPA Personal Escape Rope, Nylon Escape pouch, AutoLocking Rigging Carabiners, and RescueTECH ESCAPE Descender. To use, simply open outer pouch, grasp the AutoLocking Rigging Carabiner, and pull from bag. The 8mm EGRESS-N™ Personal Escape Rope (NFPA) makes this PER an economical choice over the fire-resistant EGRESS™. Manufactured of Nylon and Polyester, this certified cord works well with most Escape Descenders. Strength: 5,000 lbf. **CUSTOM LENGTHS AVAILABLE**

Warning: EGRESS-Nylon is not fire or heat-proof. Polyester begins to lose strength at 300 °F. Small diameter cords do not provide the same amount of rappelling friction as do larger ropes. Rescuers should practice rappelling with an 8mm cord to become familiar with the 8mm diameter lines. NFPA 1983 states that Personal Escape Ropes are for single use only.

Includes:

EGRESS-N™ P.E.R.
Bailout 8 Descender
NFPA Offset Carabiners
RescueTECH Escape Snap

Pattern may differ slightly from image.

PROBE-Hybrid™ Search Line

Aramid / Polyester Hybrid

PROBE- Hybrid rope uses both Fire Resistant Aramid Fibers and Polyester to create a highly visible and economical search rope. All of the cord's strength is derived from the Aramid Fiber. The bright Yellow polyester fibers act as a heat indicator. At 350°F the polyester fibers melt leaving the load bearing aramid in place for safety backup. Strength: 2,000 lbf. **Precut lengths are finished with a special sealant to prevent unravelling.**

52736100	PROBE-Hybrid™, 100'	75.00

PROBE™ Search Line Kits

Fire-Resistant Design

6mm cord with fire resistant sheath (Temp 900°F). 6mm cord can be felt on ground unlike units made with flat webbing. Bags are specially designed for easy deployment with structural gloves. Autolocking Fixed Eye Snap prevents accidental detachment of carabiner from its anchor. Fixed Eye prevents PROBE™ Search line cord from becoming detached from carabiner. Retro-reflective tape increases visibility of bag. Notice: PROBE™ search cord is not NFPA Personal Escape Line and cannot be used for a Personal Escape rope.

29985035	35 ft.	85.00	29985070	70 ft.	122.00
29985050	50 ft.	100.00	29985100	100 ft.	156.00

PROBE-R™ Search Line Kits

Fire-Resistant with Reflective Stripe

The same high quality materials and design as our original PROBE™ Search Line with 3M Scotchlite® added to the sheath. Provides extra visibility of Search Lines during fire operations. Notice: PROBE-R™ search cord is not NFPA Personal Escape Line and cannot be used for a Personal Escape rope.

PROBE-Hybrid™ Kits

New Hybrid 6mm Searchline Cord

Assembled with a new hybrid 6mm cord. The cord's sheath is manufactured using both fire resistant aramid fibers (Temp 900°F) for fire resistance and polyester for lighter weight. The 6mm round cord can be felt on ground unlike units made with flat webbing. Bags are manufactured of 1000 denier cordura, hook and loop fastener, nylon webbing and features Scotchlite® retro-reflective striping. Bag is specially designed for easy deployment with structural firefighting gloves. Autolocking Fixed Eye Snap prevents accidental detachment of carabiner from its anchor. Fixed Eye prevents Searchline cord from becoming detached from carabiner. Retro-reflective tape increases visibility of bag. Notice: PROBE™ search cord is not NFPA Personal Escape Line and cannot be used for a Personal Escape Rope.

RescueTECH Spin-Lock 1 way pulley

Auto-Locking Carabiners

Firefighter Ladder Rescue System

Containing the RescueTECH Spin-Lock Double Pulley, this rescue set provides a free-running 3:1 Block and tackle that does double duty as a friction lowering device. The Spin-Lock Pulley works as a capstan lowering device that provides friction while lowering the firefighter. Proper safety precautions, such as separate brakes or rope grabs are to be used when in both raise and lower modes. Sling attaches around ladder beams or to suitable rigging point above victim. Packaged ready-to-use in RescueTECH Rigging Bucket.

Marker™ Search Rope Complete with 2" Rings and Directional Marking

7.5mm RescueTECH Egress™ rope complete with 2" rings every 25 ft. Rope is marked with 3/4" nylon balls to indicate distance and direction (3 balls = 75 ft.). Using the phrase "Ring, then Bump = Out to the Pump", a firefighter can identify direction and distance to the exit. Kit includes 200 ft. with Autolocking snap sewn to each end and a Searchline Shoulder bag with quick release seatbelt buckles.

299723200

500.00

Carabiner not Included

Window Rappel Anchor

Skedco's unique anchor design allows escape from burning buildings where there are no other anchors available. This is your "Last Chance Bailout" anchor. It will fold to be carried in a holster or bailout kit. When used, the ends are extended, a carabiner is placed into the holes in both parts and the anchor is placed into the lower corner of a window and a rope is attached.

It is necessary to keep tension on your rope to prevent the anchor from slipping out of position. This anchor keeps your rope farther away from the flames which gives you a little more time to descend to safety.

Deployed measurements: 10 5/8" x 3" x 5/8". MBS 5,000 lbs. Available in Red or Black. Made in USA.

TECHNote™ Quick Attach Leg Buckles

Many RescueTECH harnesses come with Quick-Attach Adjuster Buckles. These buckles allow the user to don a harness without stepping through a leg loop. With the Quick-Attach buckles, the user simply wraps the loop around their leg, attaches the buckles together, and tightens the webbing. These buckles provide an easy way to put a harness onto a victim.

Voyager Rescue Harness

Light weight design provides ease of use. Features quick adjust legs and waist. 5" waist pad for extra comfort. Chest harness attaches to waist with a high strength stainless steel rapid link for corrosion resistance. Quick-adjust leg buckles.

712501	XLarge	305.00

Meets ANSI/OSHA Class III Full Body Harness construction requirements.

Basic Rope Access Harness

A tuned down version of the Professional Tower Rope Access harness. Waist belt portion of the harness uses smaller sized D-rings to save weight and reduce bulk. New StabLock quick release adjustable buckles on legs. Attachment points at waist, hips (positioning), chest (positioning), back (lumbar) and back (fall arrest). Chest harness designed to incorporate a chest ascender (not included) for rope access work. Weight 5 lb. 6oz.

204238712	Small	345.00
204238713	Medium	345.00
204238714	Large	345.00
204238715	XLarge	345.00

Certified to NFPA 1983 standards. Certified to ANSI/OSHA and CAN/CSA full body harness standards

OPERATOR

Work / Access Harness

Fast-Connect Cobra buckles allow easy and quick manipulation when putting the harness on. Anatomically shaped waist and leg pads provide comfort when hanging in the harness. Lightweight, excellent functionality, quick and easy adjustment makes your work safe and efficient. Size: S, M/L, XL CE 0123 • EN 358 • EN 361 • EN 813

XL	5'9"-6'8"	35-51"

Rigger's BODY™

Fall Protection Harness

Fully adjustable fall arrest harness with two attachment points in conformity with ANSI and EN 361. Works well as a victim rescue harness. CE certified.

238903421	Small	86.00
238903431	Medium/Large	86.00
238903451	XLarge	86.00

Meets all ANSI, OSHA standards and CSA construction requirements for Class III Harness.

BODY™

Fall Protection Harness

Fully adjustable fall arrest harness with two attachment points in conformity with ANSI and EN 361. Works well as a victim rescue harness. CE certified.

238903220	Small	86.00
238903230	Medium/Large	86.00
238903250	XLarge	86.00

Meets all ANSI, OSHA standards and CSA construction requirements for Class III Harness.

Rope Dancer™

Fall Protection Harness

Easy to don and easy to operate double buckles. Front and rear belay/rappel front attachment points. Reinforced tie-in loop. Full body harness designed specially for rope course.

23890502	Small	117.50
23890503	Medium/Large	117.50
23890505	XLarge	117.50

Meets all ANSI, OSHA standards and CSA construction requirements for Class III Harness.

1 "D" Fall Protection Harness

1 "D" with Positioning Rings

Industrial 1 'D'

Full Body Harness

"D" Ring Between the Shoulders

Manufactured from color coded 1 3/4" polyester webbing for ease of donning. Forged steel hardware with quick-connect friction buckles for quick secure adjustments. One sliding "D" between the shoulder blades in back for attachment of lanyards, etc. Sized to fit over clothing. Positioning version has two rings at waist level. Weight: 32 oz.

702132	Small/Large	76.00
702142	Large/XLarge	76.00

702132P	Positioning Rings, Small/Large	86.00
702142P	Positioning Rings, Large/XLarge	86.00

Meets all ANSI, OSHA standards and CSA construction requirements for Class III Harness.

3 "D" Fall Protection Harness

3 "D" with Positioning Rings

Industrial 3 'D'

Full Body Harness

"D" Rings for Lifting / Fall Protection

Manufactured from color coded 1 3/4" polyester webbing for ease of donning. Forged steel hardware with quick-connect friction buckles for quick secure adjustments. One sliding "D" between the shoulder blades in back for attachment of lanyard and two shoulder lifting rings. Sized to fit over clothing. Positioning version has two rings at waist level. Weight: 38 oz.

702332	Small/Large	91.35
702342	Large/XLarge	91.35

702332P	Positioning, Small/Large	115.00
702342P	Positioning, Large/XLarge	115.00

Meets all ANSI, OSHA standards and CSA construction requirements for Class III Harness.

Worker™ Padded Seat Harness

Our newest Class II seat harness will impress you with its versatility and comfort. Special “breathable” laminated foam padding provides comfort not often found in basic seat harnesses. Special locking buckles allow you to don without having to “step-through” the harness. Primary rigging “D” ring floats along the waist strap to better balance the forces placed on the rescue - giving greater comfort. Side “D” rings allow for placement of positioning slings.

2389133	Medium/Large	100.00
2389135	XLarge	100.00

Exceeds ASTM/ANSI/OSHA requirements for Seat Harness.

NFPA Padded Seat Harness 5" Waist Pad with Gear Loops

Same construction and specification as the NFPA Harness (right) but with special “floating” pads on the waist and legs. 4” waist pad slides to allow adjustment for multiple sizes. Gear loops on waist pad for attachment of additional equipment. 3” leg pads for superior comfort. 5” waist pad is made from custom-designed laminated foam. Exterior of pad is tough Cordura Nylon. Interior of pad is a special wicking material to pull sweat away from the rescuer’s body. Includes mesh storage bag. Weight: 48 oz.

		Waist	Gear Loops	
714201	Small	25" - 32"	2	173.00
714301	Medium	30" - 50"	4	173.00
714401	Large	36" - 54"	4	173.00

UL Certified to NFPA 1983 Class II Harness. Meets ANSI/OSHA requirements..

NFPA Seat Harness Comfortable / Non-Padded

Heavy duty 2” waist (Strength: 6,000 lbf.) is completely adjustable for all waist sizes 25 through 50 inches. Quick-adjust waist buckle for security and quick-adjust over-width leg loops provide comfort and adjustability. Forged “D” ring attachment point has a proof load of 5,000 lbf. and has been tested to 8,000 lbf. Equipment loops for carrying additional gear. Contrasting stitching for visual inspection of thread wear. Gear loop provides convenient place to hang tools. Includes mesh storage bag. Tensile Strength: 6,000 lbf. Weight: 32 oz.

704401	Fits Waist 25" - 50"	115.00
--------	----------------------	--------

UL Certified to NFPA 1983 Class II Harness. Meets ANSI/OSHA requirements.

Worker™ Chest Harness

Fully adjustable chest harness supplied with connecting carabiner. When used in combination with the Worker Padded Seat Harness, the Worker Chest harness creates a fully adjustable full body harness in conformity with EN 361 - Great for Work Access Use. Quick-Adjust buckles on shoulder straps. Do not use separately!

23891213	Worker Chest Harness	74.95
----------	----------------------	-------

WARNING:
Shoulder straps are not for vertical lifting!

TIMBER™

Full Function Seat Harness

Adjustable sliding D-ring enables you to take safe, comfortable and effective work position. Wide padding provides superior comfort. Side D-rings for work positioning or gear attachment. 4 gear loops

238900123	Med/Large	250.00
238900125	XLarge	250.00

Franklin

Work Positioning Seat

The Franklin Work Positioning Seat provides more comfort when hanging in the harness and is intended for use with our fall arrest or work positioning harnesses. Easy to adjust buckles. Wide sitting area gives good stability and comfortable hanging as well as standing work position. Suspension straps do not press on your thighs. Three D-rings (bearing capacity 110 lbs.) for gear. Max. load of seat: 500 lbs. Weight: 3.6 lbs.

23898110	Franklin	165.00
----------	----------	--------

Adjustable Seat Harness

A medium duty version of the NFPA Harness. Manufactured of sturdy 2" webbing and forged hardware. Double pass waist buckle provides non-slipping adjustment. Quick-adjust leg loops allow the rescuer to don this harness with ease. Forged "D" ring provides a secure attachment point for carabiners. Equipment loops for attaching extra hardware. Used in all types of rappelling and rescue situations. 2 gear loops. Weight: 27 oz. Color: Black.

		Waist	
710231	Medium	28 - 33"	70.00
710241	Large	34 - 40"	70.00
710251	Extra-Large	40 - 46"	70.00

Exceeds ASTM/ANSI/OSHA requirements for Seat Harness.

Adjustable TAC Harness Soft Connect Tactical Version

The TAC Harness is a version of our Adjustable Seat Harness with a modified rigging point. Many tactical teams requested a soft-connect version to reduce the metal-on-metal noise produced when a carabiner is attached to a 'D' ring. Quick-adjust leg loops allow the rescuer to don this harness with ease. Forged "D" ring provides a secure attachment point for carabiners. Equipment loops for attaching extra hardware. Used in all types of rappelling and rescue situations. 2 gear loops.

		Waist	
710331	Medium	28 - 33"	65.00
710341	Large	34 - 40"	65.00
710351	Extra-Large	40 - 46"	65.00

Ladder / Victim Harness

Quick-Connect Buckles

An innovative dual purpose harness, built to NFPA standards. Constructed of 1 3/4" high strength webbing, the Ladder/Victim Harness utilizes special forged color-coded quick-connect friction buckles on legs to aid in proper donning. Leg straps are stored in attached pouch to easily store and transport this harness. Special waist buckle pad insures user comfort. Color: Orange w/ contrasting leg straps. Weight: 32 oz.

708360 Ladder / Victim Harness 140.00

Exceeds NFPA 1983 requirements for Class II Harness.

Victim Chest Sling

Attaches to Ladder / Victim Harness, turning the system into a Class III Victim Harness. Wide, padded chest strap supports victim's upper torso during vertical lifts. Quickly attaches around victims chest. Connects with Double Locking Snap. Padded for comfort. Adjustable Chest and seat connector straps.

723201 Victim Chest Sling 68.00

Standard Chest Harness General Purpose Chest Harness

A basic style chest harness with "V" ring attachment points that can be connected with a carabiner or rope. The Standard Chest Harness features 2" chest strap webbing and 2" shoulder strap webbing. Fully adjustable. One Size Fits Most. Color: Black. Weight: 12.5 oz.

723321 Standard Chest Harness 43.00

Exceeds NFPA construction requirements.

Meets ANSI Class II Harness construction requirements.

WARNING:
Shoulder straps are not for vertical lifting!

Tactical Rappel Harness w/ 'D' Ring

Quick Fit Waist Buckle

The Tactical Rappel Harness w/ "D" Ring is a unique configuration intended for Tactical Operations. Can be worn as a belt then converted to a seat harness by simply pulling the leg portion from the waist pouch. Auto-Locking snap secures waist and forged 2-piece friction buckles secure leg loops. Optional 4" waist pad designed to accept ALICE clips. Color: Black

727321 Tactical Harness w/ D Ring 135.00

Meets NFPA/ASTM/ANSI/OSHA requirements for Seat Harness.

Deluxe Victim Rescue Cradle

Full Upper Body coverage with padded back panel for greater patient comfort and security. 7 strap support for superior strength. Forged D Tag line anchor helps rescuers control patient in vertical environment. Victim Arm Keepers maintain control of upper extremities. 4 Grab handles aid in maneuvering victim before, during, and after the vertical lift. Manufactured of 1000 den fabric with Cordura brand fibers, high strength webbing and forged steel hardware. (Manikin, Carabiner, and Tether not included.)

708353 Rescue Cradle* 190.00

**Does not replace proper patient packaging using backboard, cervical collar, and head blocks.*

Laika Dog Harness

Intended for transport of the dog from a helicopter or other high angle environments. Universal size. Aluminum-alloy adjusters. Color: Orange. Capacity: 300 lbs.

23898115 Laika 135.00

Axillar Rescue Sling For Ski Lift / Tower Rescue

The Axillar Rescue Sling is used to secure persons to be evacuated from ski lifts while the rescuers prepare the rescue equipment. Simply deploy sling, attach to an anchor point, and attach to victim. Multiple units secures victims in chair lifts awaiting rescue using the Evacuation Triangle. Meets EN1498, Type A.

23898109 Axillar Rescue Sling 46.00

Mesh Evacuation Triangle Features Adjustable Center Strap

Full body support for security and comfort. Easily installed on seated or standing persons. Grid design of webbing fully supports patient while mesh provides extra comfort as well as drainage for use in water rescues. Includes adjustable shoulder straps. Constructed of heavy duty Vinyl coated polyester mesh high strength webbing. Forged 'D' ring rigging points. High visibility contrast stripe for day or night use. Weight: 46 oz.

708352 Mesh Evacuation Triangle* 125.00

Evacuation Triangle with Shoulder Straps

A new design from our friends at Singing Rock. Complete with Shoulder Straps, this triangle offers multiple uses for victim evacuation. Versatile construction. Weight: 27 oz.

23898213 Evac Triangle w/ Straps* 105.00

GENERAL
USE

RD70™ Rescue Carabiner

Rescue Tech's newest general use carabiner. Design to meet the tough-use conditions met by Rescue Technicians. Heat-treated alloy steel construction with Gold Chromate corrosion protection.

Strength	15,737 lbf.	70 kN
WLL	1574 lbs.	715 kg
Gate Opening	1.4"	35 mm
Dimensions	5.9 x 3.6	150 x 90 mm
Weight	12.5 oz.	360gm

GENERAL
USE

RescueTECH Big Dan

Designed to Prevent Cross-Loading

Combines all the ideal design ideas into one carabiner. The Big Dan's unique frame is design to prevent cross-loading the carabiner. Cross-loads are quickly realigned to the major axis. The curved back modified 'D' design optimizes the strength and handling characteristics. Available in Twistlock, Supersafe (3 stage) and Quadlock (4-Stage) safety mechanisms.

Strength	11,241 lbf.	50 kN
WLL	1,124 lbs.	511 kg
Gate Opening	1.0"	25 mm
Dimensions	4.8 x 3.5"	123x90 mm
Weight	9.8 oz.	278 gm

6051179Q	Quadlock - 4 Stage	40.00
6051179S	Supersafe - 3 Stage	38.00
6051179T	Twistlock - 2 Stage	32.00

Meets NFPA 1983/ANSI/OSHA strength requirements.

GENERAL
USE

RescueTECH™ Wide Gate 'D'

Extra-Wide Gate Opening

Classic design with an extra-large gate opening. NFPA Rating: General Use.

Strength	16,187 lbf.	72 kN
WLL	1,618 lbs.	735 kg
Gate Opening	1.4"	36 mm
Dimensions	4.96 x 2.79	126 x 71 mm
Weight	10.2 oz.	289 gm

6050185	Wide Gate 'D' Steel	27.75
---------	---------------------	-------

UL Certified NFPA 1983.
Meets ANSI/OSHA strength requirements.

RescueTECH™ Extra-Large Rescue 'D'

Extra Large 1.5" Gate Opening

A new design in rescue carabiners. Extra-large gate and interior dimensions let this carabiner's gate close over any round structure that will fit through the gate. 1/2" alloy steel plated with Gold Chromate. Gate locking design.

Strength	12,589 lbf.	56 kN
WLL	1,259 lbs.	572 kg
Gate Opening	1.5"	38 mm
Dimensions	5.98 x 3.66"	152 x 93 mm
Weight	12.8 oz.	363 gm

6050159 XL Rescue D

27.00

UL Certified NFPA 1983.
Meets ANSI/OSHA strength requirements.

GENERAL USE

GENERAL
USE

RescueTECH™ Large 'D' Screwgate

The Basic Tool of Rescue

Traditional design facilitates use in all rescue systems. Gold or Black Chromate plating over 1/2" alloy steel distinguishes this American-made carabiner. Gate locking design prevents locking collar from jamming as a result of being tightened after load is applied.

Strength	16,187 lbf.	72 kN
WLL	1,618 lbs.	735 kg
Gate Opening	1.02"	25.5mm
Dimensions	4.96 x 2.8"	126 x 71mm
Weight	10.3 oz.	293 gm

6050182	Gold	21.70
6050183	Black	22.75

UL Certified NFPA 1983.
Meets ANSI/OSHA strength requirements.

GENERAL
USE

GENERAL
USE

RescueTECH™ Offset 'D'

High Strength / Lightweight

The best of American-made carabiners. High strength, heat treated 7/16" diameter alloy steel, and large gate opening, make this the ideal carabiner for rescue. Plated with gold or black chromate to increase resistance to corrosion. Gate locking design of the locking collar helps prevent accidental over-locking of gate after load is applied. Screwgate with internal threads to eliminate rope wear. Each carabiner is marked with strength and manufacturing batch number.

Strength	11,915 lbf.	53 kN
WLL	1,192 lbs.	542 kg
Gate Opening	.944"	24 mm
Dimensions	4.37 x 2.75"	111x70 mm
Weight	7.4 oz.	210 gm

6050170	Offset 'D' Locking (Gold)	18.75
6050171	Offset 'D' Locking (Black)	19.75

Meets NFPA 1983/ANSI/OSHA strength requirements.

RescueTECH™ Offset 'D' Autolocking

The first U.S. made autolocking carabiner. Using the traditional 7/16" Offset Carabiner Frame, the Autolock utilizes a locking collar with a unique autolocking design. Plated with gold or black chromate to increase resistance to corrosion. Each carabiner is marked with manufacturers part number, strength, and manufacturing batch number.

Strength	11,915 lbf.	53 kN
WLL	1,192 lbs.	542 kg
Gate Opening	.944"	24 mm
Dimensions	4.37 x 2.75"	111 x 70mm
Weight	7.4 oz.	220 gm

6050173	Autolock (Gold)	24.75
6050174	Autolock (Black)	27.75
6050176	Autolock, Captive Eye	27.75
6050177	3-Stage Autolock	29.50

Meets NFPA 1983/ANSI/OSHA strength requirements.

LIGHT
USE

Stainless Steel Offset 'D'

Proof Tested

Stainless Steel provides excellent corrosion resistance. Rating: Light Use.

Strength	7,870 lbf.	35 kN
WLL	787 lbs.	358 kg
Dimensions	4.5" x 2.5"	118 x 64mm
Gate Opening	.8"	20mm
Weight	7.9 oz.	225 g

6053120	Twistlock	47.00
6053121	Supersafe	51.00

Meets NFPA/ANSI/OSHA strength requirements.

WARNING

Meets OSHA, NFPA, CSA, BSI, DIN requirements.

**WLL - Recommended Working Load (also known as Safe Working Load) is calculated using the Industrial 10:1 critical use Safe Working Load Ratio.

Snap hooks are to be used in accordance with current ANSI / OSHA Fall Protection Standards.

TECHNote™

TWISTLOCK vs. SUPERSAFE™

Twistlock gates are the fastest gate locking mechanism to operate. It provides a convenient solution to eliminating the chance that the gate will accidentally be left unlocked.

Supersafe gates are triple-action twistlock construction that requires three distinct movements to unlock the carabiner gate.

WARNING

Technical rescue and safety is potentially hazardous. Any person using equipment sold by RESCUE TECHNOLOGY in any manner is personally responsible for learning the proper techniques involved, and assumes all risks and accepts full and complete responsibility for any and all damages or injury of any kind, including death, which may result from the use of any RESCUE TECHNOLOGY equipment.

Offset D Aluminum with Captive Eye

Pin holds Search Lines in Place

Same shape and closure as our Offset D Autolock Carabiner. The additional of the pin helps keep ropes and cords situation at the base of the carabiner. No longer can your search line come off the carabiner by simply sliding out the gate opening.

Strength	6,745 lbf.	30 kN
WLL	675 lbs.	307 kg
Gate Opening	.787"	20mm
Dimensions	4.5 x 2.75"	113 x 69 mm
Weight	4 oz.	113.5 gm

6051273 Autolock w/ Captive Eye 23.00

Meets NFPA 1983/ANSI/OSHA strength requirements.

*UL Certified to NFPA 1983 requirements.

NFPA Aluminum Carabiners

**LIGHT
USE**

Rescue Technology aluminum carabiners are designed with quality and utility in mind. Manufactured from high quality alloy aluminum, the sides of the standard size are flattened to give superior performance. Each carabiner is marked with its original strength and manufacturing batch. Certified by Underwriters Laboratories to NFPA 1983.

Stock Number	Description	Color	Gate (in.)	Dimensions (in.)	Strength		WLL (lbs.)	
					Major Axis	Open

Aluminum Carabiners

**LIGHT
USE**

Larger versions of our NFPA Aluminum carabiners provide a larger gate opening. The Jake is a traditional HMS style carabiner for those who need a large, smooth radius at one end. The Large 'D' is an aluminum version of our popular steel Large 'D' carabiner.

Stock Number	Description	Color	Gate (in.)	Dimensions (in.)	Strength		WLL (lbs.)

TECHNote™

UNITS OF MEASUREMENT

Pounds and kilograms are units of weight measurement (i.e. mass under the influence of gravity). Foot Pounds & kiloNewtons are the correct measurement of the force it takes to break an object. The conversion formula is pounds force(lbf.) = kiloNewtons (kN) divided by .004448.

TECHNote™

ANSI REGULATIONS

ANSI fall protection regulations state that "locking type snap hooks shall have a self-closing, self-locking keeper." This statement is normally interpreted as meaning only auto-locking carabiners (snap-hooks) meet the standard.

Mini-Haul - Light

A mini 4:1 / 5:1 Hauling system for those time where you don't need to deploy your long ropes and heavy pulleys. Perfect for litter attendants, edge transitions, and much more. Comprised of our 3/8" ACCESS Lifeline (30'), RescueTECH Double Mini Pulley (2), OD50 Carabiners (2), Prusik Cord, and pouch (will attach to harness). Tested Strength to Prusik failure: 5,500 lbf., Ultimate Strength: 7,000 lbf. Light Use

614405	Screwgate	225.00
614406	Autolock	235.00

Mini-Haul - General

A full-sized 4:1 / 5:1 Hauling System for all types of rescues. Perfect for load transfer, short haul distances, pre-rigs, and much more. Comprised of our 7/16" ACCESS Lifeline (30'), RescueTECH Double PMP (2), OD50 Carabiners (2), Prusik Cord, and pouch (will attach to harness). Ultimate Strength: 9,000 lbf. General Use

614412	Screwgate	220.00
614413	Autolock	240.00

Personal CSR / Transfer Kit

Built-In Safety Cam

Great tool for rescuers transferring the victims load to a new rescue line. Can be used as either a 4:1 or 5:1 system. Works like a "power-assist" pick-off strap. Utilizes the Micro CSR Pulley for hauling safety. Complete with storage pouch that will attach to rescue harness. Maximum Lift: 48". Weight: 50 oz.

614433	Autolock	275.00
614436	Screwgate	265.00

Rescue System Change-Over Slings

Great Addition To Pre-Rig Systems

Allows rescuers to extend a Z-rig past the lowering device without having to tie a "green" sling. Length: 15" Super Strong 8,500 lbf. WLL: 850 lbs.

753105	Dogbone Z-Rig Sling	8.25
--------	---------------------	------

Rescue System Change-Over Sling w/ "D"

Great Addition To Pre-Rig Systems

Allows rescuers to extend a Z-rig past the lowering device without having to tie a "green" sling. Super Strong: 16,000 lbf.

753106	Super H.D. Z-Rig Sling	23.00
--------	------------------------	-------

4:1 / 5:1 Extractor™ Load Transfer Kit

This kit is a mechanical advantage system that allows the user to safely transfer a load. It provides the security of a built-in safety cam. 4:1 Kit complete with 40 feet of rope for 10' of lift. Available with Autolocking or Screwgate carabiners.

614422	4:1 Load Transfer, Autolock	385.00
614425	4:1 Load Transfer, Screwgate	375.00

Meets NFPA 1983 / ANSI/OSHA strength requirements.

Extra-Large
Ladder Hook
eases attachment
to rigging point.

Over 135° of
Hauling Angle
for greater
Versatility.

Added
Safety
Feature:
Cam will
not release
under load.

Unbreakable Nylon
Thimble does not
have the hard edges
of metal thimbles.

Swaged Eyes on end of rope
meet ANSI Z359.1 vertical life-
line standard which prohibits
knots in Vertical Lifelines.

Autolocking Carabiners
compliant with OSHA
Standards which prohibit
Screwgate Carabiners.

RT Extractor show with H.D. Tripod (not included with kit)

System Rating: General Use

1/2" Extractor™ CSR Kit With Rope / Equipment Bag

614210	Basic 37 - 150 ft. of rope	675.00
614212	Basic 50 - 200 ft. of rope	750.00
614211	Deluxe 37 - 150 ft. of rope	780.00
614213	Deluxe 50 - 200 ft. of rope	880.00

7/16" Extractor™ CSR Kit With Vapor Tight Case

7/16" Extractor™ CSR Kit With Rope / Equipment Bag

614208	Basic 50 - 200 ft. of rope	630.00
614209	Deluxe 50 - 200 ft. of rope	750.00

Extractor™ Confined Space Rescue Kit Confined Space Personnel Rescue Kit

FOR RESCUE Used as 4:1 Block and Tackle or "piggy-backed" onto main haul line. Decreases training needs for mechanical advantage systems. Great re-direct pulley with a built-in safety. No loss of haul due to slack in a prusik cord or external camming safety.

FOR INDUSTRY Easy to use. Meets OSHA 1910.146 Mechanical Retrieval Device standard. Meets ANSI Z359.1 vertical lifeline standards and autolocking carabiner requirements.

LIFTING SAFETY Unit works as a hauling system with a "deadman's" safety. Included safety pin holds cam in either open (rope will run freely in both directions) or in safety position. Rope will move in hauling direction only and cannot be removed or fall out when safety is engaged. Extractor™ may be used horizontally and can be attached to a haul-line to act as a 4:1 hauling system. 1/2" version available in 37 ft. and 50 ft. lift capacity. 7/16" version available in 25 ft. and 50 ft. lift capacity.

REMOTE LOWERING CAPABILITY The attached cable allows remote control of the safety cam. This makes it possible to place the Extractor™ unit where it cannot be directly accessed. Extractor™ design provides over 135° of hauling line movement. It does not limit hauling team to standing "in-line" with the rope system. The pulley sheaves are equipped with Oilite™ bushings and will accept ropes up to 1/2" diameter. The Extractor™ frame is constructed of high tensile aluminum alloy. WLL: 1,000 lbs. Dimensions: 9" x 3". Color: Red.

All Kits include:

- ACCESS Lifeline w/ swaged eye
- EXTRACTOR™ CSR Pulley
- Double Pulley
- Autolocking Carabiners
- Carrying Case / Bag

Deluxe Kits also include:

- Fall Protection Harness
- Lifting Bridle

Extractor Kit with Case

Extractor Kit with Bag.

WARNING

Technical rescue and safety is potentially hazardous. Any person using equipment sold by RESCUE TECHNOLOGY in any manner is personally responsible for learning the proper techniques involved, and assumes all risks and accepts full and complete responsibility for any and all damages or injury of any kind, including death, which may result from the use of any RESCUE TECHNOLOGY equipment.

Confined Space Rescue Set

Designed to provide a 2-person team with a set of equipment that allows for the rescue of victims. Comes complete with Tripod and Extractor CSR Kit for an anchor point and retrieval system. A separate belay may be set up with the included Petzl I'd Belay device and 150 ft. section of 1/2" ACCESS Lifeline. Rigging equipment and edge protection is also included. All personal and team equipment, as well as hardware and tripod storage is included.

Spin-Lock Rescue / Retrieval System

Locking Pulley for Combination Raise / Lower System

The Spin-Lock Rescue system is a pre-rigged 4:1 Hauling system that utilizes a unique pulley with sheaves that rotate in only one direction. When properly rigged, this system works as an efficient 4:1 mechanical advantage pulley system that also provides friction to control the load when in lowering mode. The special sheave are mounted on a unique one-way bearing that allows the user to easily control a rescue load. Also, included is a Handled Ascender to control and anchor the system when at rest. The attached foot loop also aids the rescue in raising heavier loads.

The Spin-Lock Rescue / Retrieval Kit is a pre-rigged kit that combines the RescueTECH Remote Retrieval Hook and Extension Pole access system with a Spin-Lock Rescue / Retrieval system. The remote hook and extension pole allows for non-entry remote attachment of a rescue lifeline to a victim in a confined space or vertical environment.

TECHNote™ STEEL vs. ALUMINUM CARABINERS

1. Steel is more wear-resistant than aluminum.
2. Steel carabiners are more ductile, thus allowing a greater amount of energy to be absorbed by the carabiner prior to failure.
3. The ductility also helps the carabiner be more resistant to misuse such as non-straight line loading.
4. Steel carabiners are inherently more resistant to corrosion in alkaline environments.
5. Aluminum alloy carabiners are not suitable for use in combustible environments. D.I.N. recommends and B.S. 1397 specifies that steel carabiners be used in explosive environments. When aluminum and steel oxides combine, very high temperature spark is produced. The steel-to-steel contact sometimes cause a low temperature spark, but no data to show that this will ignite atmospheres.

TECHNoteTM RT Pulley Design

New this year is our full line of Rescue Technology Technical rescue pulleys. These pulleys are built to last. Most of our pulleys are designed without the double bend sideplates found on most pulleys and replaces them with a continuous radius bend. This bend prevents the "un-springing" of the sideplates found in traditional double bend sideplates. The Rescue Technology pulleys also feature weight reducing holes in the sideplates. Most of our pulleys also will accommodate ropes up to 5/8" (16mm). This capacity means that one pulley will handle all of today's NFPA General and Light Use ropes.

Rescue Anchor Set

We have packaged two of our Heavy Duty Anchor Straps with a Wear Guard and Delta Rapid Link to give rescuers a quick, secure, and hard wearing anchor sling set. Includes storage bag.

29982101	Large, 8' Anchor Slings	100.00
29982102	Medium, 6' Anchor Slings	90.00

Lanyard Not Included

Basic Water Rescue Set

The bare minimum equipment to have while working around water. Includes U22 Pro PFD, River Rescue Short Knife, Fox Mini Whistle, 3/8" Throwbag x 50 ft., and Mesh storage bag.

29982003	Basic Water Rescue Set	195.00

Bag Tether secures bag to tower allowing rescuer to more easily perform the rescue

RescueTECH Load Transfer System moves the rescue load onto the Tower Rescue System

Adjustable Rigging sling attaches Tower System to virtually all towers.

Internal Compartment keeps Transfer and Lowering Systems separated from Rope.

Anthrion Lowering Device controls load.

System attaches to victim with Autolocking Carabiner.

Tower Rescue System

A Rescue Technology original. Specially designed pack and rescue system allows one-handed rigging, rescue and lowering of patient. Packaged in a RescueTECH Tower Rescue Pack. Pack is designed to allow one-hand-attachment to tower and one-hand detachment of shoulder straps. Adjustable Rigging Sling easily secures Transfer and Lowering Systems to the tower. Transfer system allows rescuer to move the patient onto the rescue system. Load is lowered using Anthrion Lowering device. Features Certified NFPA 3/8" Rescue rope.

29982156 Tower Rescue System, 300 ft. 775.00

RESCUE TECH

www.rescuetechn1.com

RescueTECH 2" NFPA Single

For Ropes Up to 1/2" Diameter

A pulley that works well for all rescue and work needs.

Dimensions	4.25" x 2.5"
Strength	9,000 lbf.
WLL	900 lbs.
Weight	7.5 oz

610721 RT 2" Single, Bushing 42.50

Meets NFPA 1983/ANSI/OSHA strength specifications.

RescueTECH 3" NFPA Single

For Ropes Up to 5/8" Diameter

A new high-strength, long wearing design. Sideplate bend to the 3 carabiner rigging point reduces flexing and stresses put on bends during high load. 3/16" sideplates are designed to protect the rope as it travels through the pulley. In fact, a 5/8" diameter rope is protected by the sideplates from edge abrasion.

Dimensions	6.25" x 3.75"
Strength	11,241 (50 kN)
WLL	1,124 lbs.
Weight	16 oz.

610731 RT 3" Single Bushing 64.00

Meets NFPA 1983/ANSI/OSHA strength specifications.

RescueTECH 3" NFPA Double

For Ropes Up to 5/8" Diameter

The matching Double Pulley to our new RT 3" Single. Complete with Becket Rigging point.

Dimensions	7.25" x 3.75" x 2.325"
Strength	11,241 lbf.
WLL	1124 lbs.
Weight	24 oz.

610732 RT 3" Double, Bushing 82.00

Meets NFPA 1983/ANSI/OSHA strength specifications.

RescueTECH 2" NFPA Double

Matching Pulley for our Extractor CSR

Designed for ropes up to 1/2" Diameter. High strength and lightweight makes this the ideal multi-use pulley for rescue.

Dimensions	5" x 1.75"
Strength	9,000 lbf
WLL	900 lbs.
Weight	12 oz.

610722 RT 2" Double, Bushing 59.00

Meets NFPA 1983/ANSI/OSHA strength specifications.

RescueTECH Micro Pulley

A strong pulley in a small package. Made from alloy aluminum, this pulley is perfect for a variety of rescue uses. From Tower Rescue to Water Rescue the RT Micro is one of the most versatile pulleys around. Made for ropes 5/16" - 7/16" Diameter.

	Single	Double
Dimensions	2.9 x 1.75"	3.5 x 1.75 x 1.9"
Strength	7,868 lbf	7,868 lbf.
Weight	2.9 oz.	5.1 oz.

6101151	RT Micro - Black	29.00
6101154	RT Micro - Red	29.00
6101284	RT Micro Double - Red	53.00

Meets NFPA 1983/ANSI/OSHA strength specifications.

RescueTECH Spin-Lock Pulley Uni-Directional Pulley.

Great for raise / lower systems. Pulley sheave turn one direction making hauling easy and providing friction as the rope is belayed through the device.

Dimensions	6.7" x 3.3" x 2.4"
Strength	10,120 lbf.
WLL	1,120 lbs.
Weight	26 oz.
Color	Red

2014700 RT Spin Lock Pulley 195.00

Meets NFPA 1983/ANSI/OSHA strength specifications.

RescueTECH Extractor™ CSR Hauler

The EXTRACTOR™ CSR HAULER pulley features an integral safety cam to secure the progress of hauling systems. The first in a series of Rescue Technology pulleys that meet the rugged requirements of Rope Rescue Technicians, the EXTRACTOR™ CSR HAULER is designed for 1/2" Life Safety Rope and will accommodate ropes from 3/8" - 9/16". Special safety cam design is rope friendly and can be locked out of the way when a standard double pulley is needed. Super-strong, the EXTRACTOR™ CSR HAULER has an 1,100 lb. safe Working Load Limit.

614024	RT Extractor CSR, Double	229.50
614014	RT Extractor CSR, Single	199.50

Meets NFPA 1983/ANSI/OSHA strength specifications.

Micro CSR Pulley

The perfect size for light use and tower rescues. Ideal for 8mm - 7/16" ropes. Works with ropes up to 1/2". Built-in safety cam holds rope for use in "Jigger" or "Short-Haul" Systems.

Strength	7,000 lbf.	31 kN
WLL	700 lbs.	318 kg
Dimensions	6" x 2"	152 x 51mm
Weight	8 oz.	226 gm
Color	Purple	

614321	Micro CSR Pulley	143.00

GENERAL
USE

Knot Passing Pulley

Ideal For Use As Carriage Pulley

Heavy duty knot passing pulley. Rotating sideplates and a rigging point that will accommodate three 13mm rescue carabiners. Aluminum pulley sheave with Oilite® Bushing for durability. The Wide Pulley is designed for ropes up to 1/2" diameter. The large hole in center of the sideplates will accept an Big Hook carabiner for balanced hauling when unit is used as the top support pulley in rope traverse systems. Pitch Diameter: 2". Dimensions-Medium: 8" x 3" x 3.5". Strength: 10,000 lbf. WLL: 1000 lbs. Weight: 21 oz. Color: Red.

610015	Medium	79.00
610016	XLarge	121.00

Meets NFPA 1983/ANSI/OSHA strength specifications for Pulleys

TECHNote™

BEARING vs. BUSHING

In rescue loads, the friction difference between bushings and bearings is minimal. It is only with loads that are greater than 5,000 lbf. that you begin to see the difference in friction. Ball bearings can dent the bearing race (brinelling). Sealed bearings can become contaminated with grit and seize. Oil Impregnated bronze bushings are stronger because there is a constant interface between the shaft, bushing, and pulley sheave. The bronze bushing is made from a soft material that will conform to the contaminant. Additionally, pulleys with bushings can be taken apart and cleaned.

GENERAL
USE

Kootenay Pulley

Designed for passing knots in rope.

- High efficiency sealed ball bearings.
- Locking pins allow use as an anchor.
- Fits ropes from 5/16" to 3/4".
- Breaking strength: 8,992 lbf.
- Height: 10.25"
- Weight: 49 oz.
- Individually tested

2354067	Kootenay Pulley	159.95
----------------	-----------------	--------

Meets NFPA 1983/ANSI/OSHA strength specifications for Pulleys

GENERAL
USE

Stainless Steel Carriage Pulley

The most versatile Knot-Passing / Highline pulley yet. Extra-wide 3" sheave easily passes knots in 1/2" rope. Large center rigging hole accepts up to three large carabiners, two smaller holes provide tagline attachments. Pins stowed directly on sideplates install to lock the sheave, allowing the pulley to be used as a high-strength tie off. Weight: 24.6 oz.; Dimensions: 10" x 5"; Efficiency: 91.4%; Strength: 15,000 lbs.

Single Pulley with Becket

Specialized rigging pulleys with stainless steel sideplates and either an aluminum or steel sheave, with bearing or bushing. The aluminum sheave models are ideal in rescue situations for use with rope. By using the extra rigging hole at the bottom of the pulley, they can be daisy-chained together in block and tackle fashion. Steel sheave models are great for use with steel cable or rope. In high line situations, the extra hole can be clipped together for an extra margin of safety. Rating: General Use.

Stainless Steel Trolley Pulley For Steel Cables

Sheaves turn on Sealed Ball Bearing for smooth, wobble-free use. Oversized stainless steel sideplates extend well beyond the sheaves to protect them from hard use. A rear slot allows a steel carabiner to surround the cable, allowing redundancy from the cable to the load. Dual Hardened Sheaves that will accommodate 3/8" or 1/2" cable.

6102221 Steel Cable 160.00

**GENERAL
USE**

Triple Sheave Pulley

The only aluminum triple sheave pulley with rotating sideplates. Designed for 7/16" - 5/8" ropes. Can be reeved at any point on the line. High strength alloy aluminum construction with Oilite® Bushing or Sealed Bearing. Triple carabiner rigging point. Tensile Strength: 15,000 lbf. WLL: 1,500 lbs. Dimensions: 10" x 4" x 4.5". Pitch Diameter: 3.5". Weight: 70 oz. Color: Gold. Rating: General Use.

610034 4" Triple, Bushing 160.00
610034B 4" Triple, Bearing 201.00

Meets NFPA 1983/ANSI/OSHA strength specifications for Pulleys

Easy Lift Evacuation Pulley

For Ski Lift Rescues

Designed to be connected directly to the main ski lift cable for lift evacuations. Manufactured of alloy aluminum body, nylon sheave, and stainless steel gate. Must be used with back-up lanyard and belay system. Weight: 1420 gm. Strength: 30 kN. Works on cable up to 55mm.

23896104

290.00

**GENERAL
USE**

Stainless Steel Triple Pulley

Super-Strong and Super-Durable. For rope diameters 3/8" - 5/8". Rigging Hole accommodates 3 large rescue carabiners. Dimensions: 8" x 4.75" Weight: 5.25 lbs. Strength: 30,000 lbs.

6102134 Bushing 170.00
6102135 Bearing 195.00

Meets NFPA 1983/ANSI/OSHA strength specifications for Pulleys

Gibbs Ascender

New Spring Design

One of the strongest closed cam type of rope-grab ascenders. Rounded tooth cam design minimizes rope wear yet holds on wet or icy ropes. New spring attachment increases cam's range of motion to decrease chance of spring breakage. 1/2" model attaches to synthetic ropes 5/16" to 1/2"; 3/4" version accommodates synthetic ropes from 5/8" to 3/4". The spring-loaded type is always in locked position and is recommended for general rescue use. For use on kernmantle rope only.

	Size/Shell/Description	Cam Type	Strength (lbf.)	Weight (oz.)	Rating	
a.	602011 1/2" Aluminum, Free Running	Forged	2,500	7	Light	48.00
b.	602012 1/2" Aluminum, Spring Loaded	Forged	2,500	7	Light	48.00
c.	602012F 1/2" Aluminum, Spring Loaded	Forged	5,200	9.2	General	65.00
d.	602112 1/2" Stainless Steel, Spring Loaded	Forged	5,200	12	General	65.00
e.	602013 3/4" Aluminum, Spring Loaded	Forged	5,200	14	General	68.00
f.	602113 3/4" Stainless Steel, Spring Loaded	Forged	5,200	20	General	73.00
g.	602201 Replacement Spring Kit (Ascender not included)					5.60

Meets NFPA 1983 strength specifications for ascenders.

CMI Ropewalker Ascender

Manufactured from alloy aluminum or stainless steel and forged aluminum cam. Large attachment point accommodates multiple carabiners. Unique spring design allows for easy adjustment of tension. Spring tested to over 1 million cycles. 3/8" to 5/8" diameter rope capacity. Pin can be inserted from either left or right side to accommodate needs of rescuer. 3 sigma rated to 7,700 lbf. Rating: General Use. For use on kernmantle rope only.

602241	Aluminum	66.00
602245	Stainless Steel	72.50

Meets NFPA 1983 strength specifications for ascenders.

Top: Stainless Steel; Bottom: Aluminum

Gibbs Slinger™

We combine the rescue versions of the 1/2" Gibbs Ascender with our high strength 1" Flat web to create a versatile rope grab system that virtually eliminates torsion loads on the rope grab and carabiner.

602212A	Aluminum	80.00
602212S	Stainless Steel	84.00

Meets NFPA 1983 strength specifications for ascenders.

ISC Rescue Ascender

New Pin Design

Manufactured from high strength aluminum alloy. Machined from thick walled extrusion for extra durability. Shell has special curved rope interface section for superior rope strength and minimized rope damage. Rigging point will accommodate all of our carabiners and will pass many locking collars. Quick-attach pin for easy attachment. For use on kernmantle rope only.

602251	Standard, 7/16-1/2"	83.00
602252	Large, 5/8"	85.00

Meets NFPA 1983 strength specifications for ascenders. BS EN 567 Certified as Rope Clamps

⚠ WARNING

SHOCK LOADING

Ascenders: Standard cam-type ascenders can severely damage or destroy a rope if subjected to extreme shock loading. Use caution when using systems incorporating standard cam ascenders.

Ultrascender

One of the strongest open-sided ascenders available. Machined from solid aircraft aluminum extrusion with 4140 chrome-moly steel cam with a new non-metallic finish that has the same corrosion resistance as stainless steel and is harder than knife blades and files. The unit will accommodate ropes from 1/4" (6mm) to 5/8" (16mm) in diameter. Special safety gate design is superior to other open-sided ascenders. Attach to carabiners, ascender slings, or combination. Set includes one right and one left hand unit. Tensile Strength: 5,000 lbf. Rating: General Use. Dimensions: 7.5 x 9" ea. Wgt/pair: 18 oz.

6020031N	Ultrascender, Pair (BK)	155.00
6020034N	Ultrascender, Pair (RD)	155.00

Meets NFPA 1983 strength specifications for ascenders.

GENERAL
USE

Top: Ultrascender (Black)
Bottom: Ultrascender (Red)

GIBBS KlimAir

A new item from the makers of the Classic Gibbs Ascender, the Klimair acts as a mechanical prusik knot. Its bi-directional rope grabbing capability allows a multitude of uses. The swivelling rigging point lets this unit work with positioning ropes and permits the climber to climb past obstructions (girders, tree limbs, etc.) without removing the unit or utilizing a second rope grab. For use on 1/2" synthetic ropes only. Secures to rope with a split ring and clevis pin.

602263	Gibbs Klimair	94.50
---------------	---------------	-------

Industrial Rope Grab with Lanyard For Vertical Lifelines

Stainless steel fall arrest device especially designed for vertical applications. Unlike other cam-type grabs, these grabs slip before rope failure. Rope Grab clutching effect begins at 1,000 lbf. on 1/2" ropes. For this reason use ONLY on the correct diameter rope. These grabs have the 2" diameter rigging hole to prevent rollout of attaching snaps. Comes with a permanently attached nylon lanyard equipped with a double locking snap hook. Manufactured in the U.S.A. Weight: 1.5 lbs.

6025231	7/16" Rope Grab with Web Lanyard	125.00
6025241	1/2" Rope Grab with Web Lanyard	125.00
6025251	5/8" Rope Grab with Web Lanyard	125.00

Meets all OSHA, NFPA, CSA, and ANSI standards for rope grabs and ascenders.

GENERAL
USE

Anthron Handled Ascender

A great new handled ascender.

Manufactured of aluminum, the Anthron fits ropes 8mm - 1/2" in diameter. Special grip material on handle is very comfortable and is slip-resistant. Fits ropes 8mm - 1/2".

CE
GENERAL
USE

Weight:	8.5 oz.	204 gm
Dimensions	7.6" x 3.6"	194 x 93mm

602301	Left Hand (Gold)	67.00
602302	Right Hand (Blue)	67.00

Meets NFPA 1983 strength specifications for ascenders.

Anthron Chest Ascender

Chest Ascender for Rope Access

Manufactured of aluminum, the Anthron fits ropes 8mm - 1/2" in diameter. Works with our New VANGUARD™ and Observer™ Harnesses. Fits ropes 8mm - 1/2". Color: Blue.

CE

Weight:	4.9 oz.
Dimensions	4.6 x 2.9 x 1.4"

602306	Chest Ascender	60.00
---------------	----------------	-------

Meets NFPA 1983 strength specifications for ascenders.

GENERAL
USE

Petzl I'D® NFPA

For Descending and for Belaying, with an Anti-Panic function.

Swinging side plate with safety catch decreases risk of dropping device and allows rapid installation of the rope into the device. Anti-error feature helps avoid accidents due to incorrect installation of the rope in the device. Self-braking system: if the handle is released during descent, the cam rotates to pinch the rope and brake the user's descent. Anti-panic handle: the I'D® will lock onto the rope if the user pulls too hard on the handle. To descend, simply pull on the handle; the rate of descent is controlled by varying the grip on the free end of the rope with the other hand. For work positioning, the handle can be rotated to secure the I'D® in place on the rope, thus eliminating the need to "tie off" the device. May be used as a progress capture device in a haul system; allows rapid conversion between raising and lowering. Individually tested. Weight: 18.7 oz.

2354120N Large - NFPA G, 11.5-13 mm 210.00

2354120S Small - NFPA L, 10 -11.5 mm 210.00

CE EN 341 class A, Large: NFPA G. Small: NFPA L.

Pro-Traxion

Ratchet Pulley

For effective and comfortable hauling of heavy loads. Very effective as a progress capture device for travel along a Tyrolean traverse.

- 38mm sheave mounted on sealed ball bearings for high efficiency.
- Moving sideplate allows the rope to be installed when the device is attached to the anchor.
- Chrome-plated steel cam has inclined teeth and self-cleaning slots to provide grip on wet, icy or muddy ropes.
- For use with ropes from 5/16" - 1/2"
- Strength, Pulley only: 22 kN.
- WLL, Pulley only: 6 kN.
- Strength - Ratchet Pulley: 4 kN.
- WLL- Ratchet Pulley: 2.5 kN.

23541651 Pro-Traxion 115.00

Adjustable Foot Sling

A handy sling that, when used with a handled ascender, allow the rescuer to climb up a rope. Easily attaches to ascender with rapid link (link not included). Adjustable length.

602431 Adjustable Foot Sling 15.00

60510106 Connector 2.20

Ascender Sling Set

Designed for use with handled ascenders to allow rescuer to climb back up a rope. Manufactured of high quality 1" nylon webbing (Tensile Strength: 6,000 lbf.). One sling attaches to a seat harness, the stirrup connects a second ascender to the right or left foot. Weight: 8 oz./pair. Color: Orange.

602300 Medium - up to 6' height 20.00

602400 Large - over 6' height 20.00

WARNING

Technical rescue and safety is potentially hazardous. Any person using equipment sold by RESCUE TECHNOLOGY in any manner is personally responsible for learning the proper techniques involved, and assumes all risks and accepts full and complete responsibility for any and all damages or injury of any kind, including death, which may result from the use of any RESCUE TECHNOLOGY equipment.

Double Foot Sling

For those time where a single foot loop will not work, the RescueTECH Double Foot Sling fits the need. A handy sling that, when used with a handled ascender, allows the rescuer to climb up a rope. Easily attaches to ascender with rapid link or girth hitch. Foot loops held open by special stiffener.

6024321 Double Foot Sling

21.00

Deluxe Ascender Sling Set

Can be configured for both Texas and "Frog" style ascending systems. Simply attach slings via rapid link or girth hitch to ascenders. Adjustable harness attachment slings give this set a wide size range. Manufactured of high quality 1" nylon webbing. Two slings attach to a seat/chest harness. The double foot loops connects a second ascender to the rescuers feet. Special adjuster for the foot loops help prevent loops from sliding off boots.

6024334

35.00

Ascenders, Rapid Links and Carabiners not included

RescueTECH BailOut 8™

A compact 8 with ears for quick personal escapes. Machined from 1/2" alloy aluminum. Rescue "ears" are situated to provide a compact Rescue 8 design for escape systems. Dimensions: 4.5" x 3.75". Strength: 4,946 lbf. WLL: 300 lbs. Weight: 4 oz. Rating: General Use.

601008 BailOut 8™ 19.50

Meets NFPA 1983/ANSI construction specifications for Descenders.

RescueTECH Escape 8

A compact Escape descender with ears for quick personal escapes. Rescue "ears" are situated to provide a compact Rescue 8 design for escape systems. Dimensions: 2 7/8" x 2 3/4". Strength: 3,150 lbf. WLL: 300 lbs. Weight: 4 oz. Rating: Escape Use.

6010064 Red 18.90
6010061 Black 18.90

Meets NFPA 1983/ANSI construction specifications for Descenders.

RT Escape Descender shown in one of many friction settings.

Escape Descender

Special descender plate with multiple holes that allow a small diameter escape cord to be rigged to accommodate different amounts of friction. ALWAYS test your personal rigging method to assure sufficient friction for a safe descent. Works with 8mm to 11mm diameter escape lines. Dimensions: 4" x 2.75". Tensile Strength: 5,000 lbf. Rating: General Use.

601005 Escape Descender 25.00

Meets NFPA 1983/ANSI construction specifications for Descenders.

Tuba® Belay Tube

Designed for lowering loads over long distances. The braking power is easily adjusted by varying the number of turns of rope around the device. Special shape allows the passage of a knot, allowing several ropes to be joined together for long lowers. Weight: 43.7 oz. NFPA G.

2354212 Tuba 179.95

Meets NFPA 1983/ANSI construction specifications for Descenders.

Anthon Double Stop Descender

A manually operated controlled descent device that utilizes a cam assembly that provides friction on the rope to hold a load, or allow the load to descend. To begin descent, the user depresses the control lever. If the control lever is fully depressed in a panic situation, the descent will stop. Normally, connected directly to the users seat harness, the Anthon may be attached to a rigging point and used as a lowering device. Can be placed on the rope at any point. WLL: 300 lbs. For 3/8" - 7/16" ropes. Best control with 7/16" ropes. Dimensions: 7.5 x 3.3". Weight: 8 oz.

6010097 Anthon Descender, 7/16" 130.00

Meets NFPA 1983/ANSI construction specifications for Descenders.

ISC Descender

Superior Control vs. Competition

Special descender with a 500 lb. Working Load Limit. Complete with a double action anti-panic handle. Manufactured from aluminum alloy. 100% inspected and function tested. Works on rope diameters: 10.5 - 11.5mm. ALWAYS test your personal rigging method to assure sufficient friction for a safe descent. Tensile Strength: 5,000 lbf. Dimensions: 193 x 79 x 35mm Rating: General Use.

601340 ISC Descender 140.00

Meets NFPA 1983/ANSI construction specifications for Descenders.

WARNING

Technical rescue and safety is potentially hazardous. Any person using equipment sold by RESCUE TECHNOLOGY in any manner is personally responsible for learning the proper techniques involved, and assumes all risks and accepts full and complete responsibility for any and all damages or injury of any kind, including death, which may result from the use of any RESCUE TECHNOLOGY equipment.

GENERAL
USE

RescueTECH™ Steel Rescue 8

Three Dimensional Design

Forged Steel Rescue 8 Descender. For ropes up to 3/4" diameter. Three dimensional design allows user to vary friction depending on which way the descender is used. Drop forged. Chromium Plated Silver. Tensile Strength: 15,000 lbf. WLL: 1500 lbs. Dimensions: 6.75" x 6.75". Weight: 24 oz. Rating: General Use.

6010070	Silver	50.00
6010071	Black - NEW!	60.00

Meets NFPA 1983/ANSI construction specifications for Descenders.

GENERAL
USE

Rescue TECH Figure 8 Traditional Design

The RescueTECH Figure 8 is an economical anodized figure 8 descender for light duty use. Forged aluminum construction. Rappel/Belay Usage Strength: 7000 lbf. WLL: 700 lbs. Dimensions: 5 1/2" x 2 7/8". Weight: 4.8 oz. Rating: General Use.

601316	Figure 8 (Blue)	12.00
601311	Figure 8 (Black)	12.00

Meets NFPA 1983/ANSI construction specifications for Descenders.

GENERAL
USE

CMI Rescue / Regular 8 Descenders

The Original Rescue 8

Cold forged design with durable hard-coat anodized finish. Rescue 8 has "ears" to aid in "locking-off." Color: Charcoal. Rating: General Use. Dimensions: Large: 6.6" x 6"; Small: 5.5" x 2.73".

		Dim. (in.)	Weight (oz.)	Strength (lbf.)	WLL (lbs.)	NFPA Rating	
601000N	Rescue 8	6 3/4 x 6 1/8	7.8	10,000	1000	General	46.00
601001N	Regular 8	5 1/2 x 3	4.2	10,000	1000	General	28.60

Meets NFPA 1983/ANSI construction specifications for Descenders.

GENERAL
USE

Stainless Steel Small Rescue 8

A small rescue 8 with the durability and strength of Stainless Steel. Strength: 9000 lbf. Only 5.7" long, this tough unit will fit into almost all rescue kits. Dimensions: 5.7" x 5.3". Weight: 16 oz.

240180510	40.00
-----------	-------

Descender Link shown with BailOut 8 (not included)

Descender Link

A multiple loop extension for descenders. Built with the same high strength design as our daisy chains, the directional loops allow multiple adjustments of the overall length of the descender system.

758124	Descender Link	13.00
--------	----------------	-------

CAUTION: Care must be taken when using the Steel Rescue 8 to rappel, belay, or lower personnel or heavy loads. Steel does not provide as much friction as aluminum figure 8's of similar design and size.

WARNING

Technical rescue and safety is potentially hazardous. Any person using equipment sold by RESCUE TECHNOLOGY in any manner is personally responsible for learning the proper techniques involved, and assumes all risks and accepts full and complete responsibility for any and all damages or injury of any kind, including death, which may result from the use of any RESCUE TECHNOLOGY equipment.

LIGHT
USE

RescueTECH Rappel Rack

This is the classic design developed in the 1960's. Primarily designed as a personal rappel device on a single rope 3/8" to 1/2" in diameter. Top Bar and Top Bar - Hyperbar has a training groove on one side to assist in guiding the rope and aid in proper rigging.

601024W	Standard, Complete	66.00
601011	Replacement - Grooved	6.00
601010	Replacement - Angle Slot	5.25
601011H	Replacement - Hyperbar	15.00

Meets NFPA 1983/ANSI construction specifications for Descenders.

GENERAL
USE

RescueTECH Rescue Rappel Rack

This is an upgraded version of our popular rappel rack. Large bars provide greater strength and control of rescue loads. Top Hyperbar aids in lock-offs. Grooved bars help guide the rope through the rack.

601124	Rescue Rappel Rack	80.00
---------------	--------------------	-------

Meets NFPA 1983/ANSI construction specifications for Descenders.

WARNING

Technical rescue and safety is potentially hazardous. Any person using equipment sold by RESCUE TECHNOLOGY in any manner is personally responsible for learning the proper techniques involved, and assumes all risks and accepts full and complete responsibility for any and all damages or injury of any kind, including death, which may result from the use of any RESCUE TECHNOLOGY equipment.

GENERAL
USE

RescueTECH Rescue Rack™

Superior Control of Rescue Loads

The safest, heavy duty lowering and rappelling device. Can be placed onto rope at any point. Friction may be varied by sliding easily rigged bars up or down — even while on rappel or during lowering operations. Specially designed straight cut 1" aluminum friction bars help prevent mis-rigging. Extended top bar for quick lock-off. Accommodates ropes from 1/4" to 1 1/2" or double ropes up to 3/4". One person can easily control a 1,000 lb. load. Frame manufactured of 304 stainless steel and will accommodate four 13mm carabiners. Special design of the frame distributes the load between both sides of the unit. Tensile Strength: 10,000 lbf. WLL: 1,000 lbs. Dimensions: 15" x 3". Weight: 30 oz.

601102	Standard (shown left)	60.00
601202	Hyperbar (shown right)	70.00

Meets NFPA 1983/ANSI specifications for Descenders.

GENERAL
USE

CMI Mini Rescue Rack

A handy alternative for shorter drops and lighter loads. Similar in design to the standard CMI Rescue Rack by uses 5/16" Stainless Steel for the frame and aluminum for the brake bars. Top bar is oversized with a single lock-off pin. Pre-assembled with two fixed and two straight slotted bars. Weight: 11 oz. Dimensions: 8.25" x 3.5". Strength: 14,000 lbf. Rating: General Use.

601112	Standard HyperBar	69.50
601113	Double HyperBar	83.00

Meets NFPA 1983/ANSI specifications for Descenders.

GENERAL
USE

CMI NFPA Rappel Rack With Hyperbar

Welded eye construction available in parallel or 90° to the bars. All welds are Zyglo inspected to insure reliability. The rack comes pre-rigged with six angle slotted Stainless Steel bars. Length: 19 1/2". Weight: 15.2 oz.

601034N	Standard	80.00
6010349N	90° Rigging Point	80.00

Meets NFPA 1983/ANSI specifications for Descenders.

CAUTION: Care must be taken when using the Steel Brake Bars to rappel, belay, or lower personnel or heavy loads. Steel does not provide as much friction as aluminum.

GENERAL
USE

CMI Rescue Rack

Oversized Aluminum Top Bar and Stainless Steel Friction Bars

3/8" diameter stainless steel frame fitted with oversized aluminum top bar and 5 stainless steel brake bars. To compensate for the reduced friction inherent in stainless steel bar, the diameter of the friction surface is a full 1". The special "open back" design of the bars help avoid improper rigging. Hyperbar model features stainless steel top bar with two lock-off pins. Length: 16" Strength: 19,000 lbf.

		Weight
601102S	Standard (shown top)	34 oz. 75.00
601111S	HyperBar	35 oz. 103.50

Meets NFPA 1983/ANSI specifications for Descenders.

GENERAL
USE

Magnum Rigging Plate

Large size and 16 holes to accommodate multiple rigging needs. Manufactured of alloy aluminum. Rating: General Use.

Length:	9.75"	249 mm
Width:	5.875"	150 mm
Hole size:	3/4"	19 mm
Weight:	17 oz.	471 gm
Strength:	12,365 lbf.	55 kN
WLL:	1,236 lbs.	561 kg

603216 Magnum Rigging Plate 80.00

GENERAL
USE

Technical Rescue Rigging Plate

A standard size multi-hole rigging plate. Manufactured of alloy aluminum. Rating: General Use.

Length:	6.62"	165.6 mm
Width:	4.32"	108 mm
Hole size:	3/4"	19 mm
Weight:	9.4 oz.	262 gm
Strength:	12,365 lbf.	55 kN
WLL:	1,236 lbs.	561 kg

603215 Technical Rigging Plate 44.00

GENERAL
USE

Stainless Steel Rigging Plate

Heavy Duty / Lightweight

Designed to compliment your existing rigging equipment. Lightweight, strong and effective. Allows rigging team to set up more efficient anchor systems. Prevents carabiners from jamming together. Machined from stainless steel. Dimensions: 5" x 5". Weight: 8.6 oz. Strength: 13,000 lbf. WLL: 1300 lbs. Rating: General Use.

603211 Stainless Steel 61.70

GENERAL
USE

Beam Clamp

Designed as a high strength portable rigging point for both horizontal and vertical I-Beam structures. The turnbuckle type threaded mechanism allows quick attachment to 3" - 9" flange widths. Every unit is tested and certified before shipment.

	Standard Duty	Heavy Duty
WLL, Personnel:	1,000 lbs.	2,000 lbs.
WLL, Equipment:	2,000 lbs.	4,000 lbs.
Weight:	10 lbs.	11 lbs.
Rating:	General	General

603411 Standard 85.00
603412 Heavy Duty 90.00

Micro Rigging Plate

The smallest rigging plate in the Rescue Technology line. Made from 1/4" alloy aluminum plate, the Micro Rigging Plate is both strong and lightweight. Ideal for Search and Rescue, Climbing, and Litter Bridles. Dimensions: 3.5" x 3.25". Hole size: 13/16". Strength: 35kN (7,800 lbf.)

603214 Micro Rigging Plate 26.25

GENERAL
USE

Rigging Rings

Traditional forged rings to be used as rigging rings, connection points for rigging a stretcher, and many other uses. Drop forged alloy steel. Inside Diameter: 3 inches. Rating: General Use.

	Description	Strength (lbf.)	Wgt (oz.)	
603230	1/2" Ring	10,000	9.7	9.50
603240	9/16" Ring	44,000	12.5	12.00

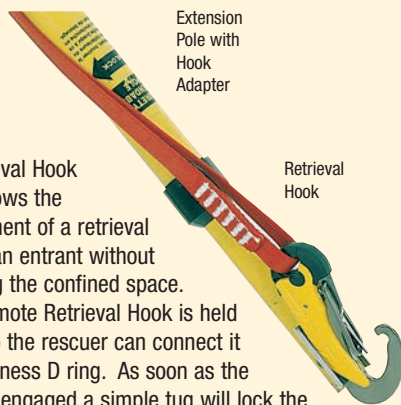

WARNING

Remote Retrieval Hook Hold-Tite Pole Adapter Holds Hook

A Retrieval Hook that allows the attachment of a retrieval line to an entrant without entering the confined space. The Remote Retrieval Hook is held open so the rescuer can connect it to a harness D ring. As soon as the snap is engaged a simple tug will lock the Hook to the harness. Sling may be attached to end of retrieval line for victim rescue. Comes complete with auto-locking snap and nylon sling. Extension Pole with Hook Adapter sold separately. Hook Materials: Stainless Steel w/ protective plastic shroud. Gate Opening: .75" Hook Strength: 5,000 lbs. Remote Retrieval Hook and Pole sold separately

616101	Retrieval Hook w/ Sling	55.00
616112	Extension Pole, 6 - 12 ft.	70.00
616124	Extension Pole, 8 - 24 ft.	95.00
616200	Storage Bag, 6 - 12' Pole	30.00
616210	Storage Bag, 8 - 24' Pole	35.00

Forged Anchorage Connector I With Threaded Stud

Drop forged alloy steel. Meets or exceeds ANSI Z359.1 and CSA Z259.12-00. Complete with grade 9 nut and lock washer. Recommended torque value: 45 - 55 ft-lbs. Bolt diameter: 1/2"

603105 Anchor Connector I 29.00

Forged Anchorage Connector II For 1/2" or 5/8" Bolts

Drop forged alloy steel. Meets or exceeds ANSI Z359.1 and CSA Z259.12-00. Use minimum grade 8 bolt and nut with lock washer. Select 1/2" or 5/8" bolt models. Bolt Length: 1.5".

Recommended Torque Values: 1/2" 13 TPI bolt: 65 - 75 ft lbs.; 5/8" 11 TPI Bolt: 145 - 155 ft-lbs.

603108	For 1/2" x 13 TPI Bolt	28.00
603109	For 5/8" x 11 TPI Bolt	29.00

CMI Drag Hook

Manufactured of forged steel eyebolt and five 4140 chromemoly steel tines. Each tine is heat treated to resist a load of approximately 2,000 lbf. Each Drag Hook is sandblasted and coated with baked-on epoxy coating. Available Deployment Bag is specifically designed for use with the Drag Hook. Dimensions: 12" x 8.5". Weight: 3 lbs. Color: Black.

624100	Drag Hook	130.00
624105	Deployment Bag	33.00

ISC Girder Grip For Steel Work

Anchor designed to provide secure anchor points through steel structure. Fits hole size: 19 - 28mm. Manufactured of high tensile strength steel and aluminum. Minimum strength: 6,000 lbf.

603110 Girder Grip 137.00

Actuated Girder Grip
ready for insertion

Snow/Sand Picket

Custom "Anchor" shaped structural aluminum alloy pickets in two lengths. Multiple rigging holes for ease of use. No sharp edges. Powder coated for durable good looks.

603136 36" Picket 25.00

WARNING

Technical rescue and safety is potentially hazardous. Any person using equipment sold by RESCUE TECHNOLOGY in any manner is personally responsible for learning the proper techniques involved, and assumes all risks and accepts full and complete responsibility for any and all damages or injury of any kind, including death, which may result from the use of any RESCUE TECHNOLOGY equipment.

2:1 Pick Off Strap

Built-in Mechanical Advantage

Used for patient pick-off situations. Configuration allows for 2:1 and 3:1 mechanical advantage for easier handling of loads. Materials: 1 3/4" Heavy Duty TECHWeb webbing with Forged D-Ring and Adjuster Buckles. Strength: 7,000 lbf.

756104 2:1 Pickoff Strap 32.00

Transfer Sling

Ideal for Rescue Pick-Off

Manufactured with heavy duty TECHWeb 1 3/4" flat webbing and has a forged "D" ring sewn in one end and an adjustable "V" ring on the other end. Adjusts by pulling on the hand loop. The "V" ring adjuster buckle slips at 4,500 lbf. Hardware Proof Load: 2,500 lbf. Weight: 12 oz. Length: 10 - 54" Rating: General Use.

756103 Transfer Sling 30.00

Adjustable Rigging Sling

With Heavy Duty TECHWeb

An adjustable length rigging sling. Manufactured of heavy duty TECHWeb 1 3/4" flat webbing and has a forged "D" ring at each end. Adjusts with a slide adjuster. Webbing Strength: 10,000 lbf. Tensile Strength: 8,000 lbf. WLL: 800 lbs. Length: Adjustable 5 - 9 ft. Weight: 10 oz. Color: Gold.

756106	Adjustable, 2- 6 ft.	40.00
756105	Adjustable, 5- 9 ft.	42.00

Heavy Duty Load Release Strap

The Load Release Strap uses 10,000 lbf. rigging "D" Rings and a standard 1.75" forged "D" on the adjustment part. 10,000 lbf TECHWeb is used to provide superior strength over units using type 13 webbing. Designed to prevent the adjustment end of the webbing from sliding through the rigging "D" rings.

756202 36.00

Eye Sling™

Unique Loop Sling with Rigging Eye

Specially constructed loop sling with a rigging eye at one end. Strength: 6745 lbf. WLL: 675 lbs.

2389201	24"	16.50
2389203	48"	22.75
2389204	60"	25.00

Meets CE, EN 354, ED 795B

TECHNote™

Sling and Lanyard labeling

Rescue Technology labels all of our Rescue Slings and Lanyards with recommended Working Load Limits. Where applicable, the WLL is illustrated for a variety of rigging uses. Since the label states specific limits, rescuers don't have to calculate load limits during the rescue. For Quality Control purposes, the labeling also specifies part number, Production Lot Number and Production date. This information lets us track all aspects of the production of the equipment.

RESCUE TECHNOLOGY 770-832-9694 FAX (770)832-1676

Maximum Working Load Limit for NEW sling *WARNING* DO NOT EXCEED

WWL @ 10:1	Vertical lbs. ▮	Choker lbs. ●	90° Basket lbs. ▮	60° Basket lbs. ▮
Part No.	Length ft.		Lot	Date

WARNING: Exceeding Working Load Limit can result in loss of load, serious injury, or death. Do NOT expose to temperatures above 250°F. Do NOT use unless properly trained. INSPECT BEFORE EACH USE!! Meets ANSI/OSHA/NFPA

Heavy Duty Anchor Sling

Strongest 1" Heavy Duty Double End Rigging Sling

Eliminates wasted rigging time spent tying knots in rigging lines. Made from 1" solid weave, high strength nylon webbing. The special webbing has RED tracers to indicate cuts in the webbing. Available in multiple lengths, each sling has a sewn loop at each end to provide maximum versatility. Anchor points may be wrapped single, double, triple, etc., to suit particular rescue situations. Anchor Slings exceed all standards and regulations for Light Use Life Support lines. When looped like a basket hitch, anchor slings meet General Use load requirements. Tensile Strength: 8,500 lbf. WLL: 850 lbs. Color: Yellow.

7550032	3 ft.	11.50
7550042	4 ft.	12.00
7550052	5 ft.	12.50
7550062	6 ft.	13.50
7550082	8 ft.	14.50
7550102	10 ft.	15.50

Super Duty Anchor Sling

Strongest Webbing Slings in the Rescue Industry

Manufactured from 2" wide solid weave high strength webbing. Special RED internal tracers function as edge cut indicators that are exposed when the webbing edge is abraded, cut, or torn. Large heavy duty forged steel links on each end will allow end-to-end, basket, and choker use of the sling. Exceed all standards for two person lifeline strengths. Tensile Strength: 15,000 lbf. WLL: 1,500 lbs. Color: Yellow. Rating: General Use.

756504	4 ft.	38.00
756506	6 ft.	40.00
756508	8 ft.	42.00
756510	10 ft.	44.00

Heavy Duty Anchor Sling w/ "D" Ring

Made with TECHWeb

Manufactured from heavy duty TECHWeb flat webbing (Tensile Strength: 10,000 lbf.). Each sling has a "D" ring (proof Load: 5,000 lbf.) sewn at each end to provide maximum versatility. Anchor points may be wrapped single, double, triple, and rigged choker-style to suit particular rescue situations. When looped like a basket hitch, anchor slings meet General Use load requirements. Although webbing tensile strength is high, overall tensile strength is limited by the "D" rings. Tensile Strength: 8,000 lbf. WLL: 800 lbs. Color: Yellow.

7591032	3 ft.	20.00
7591042	4 ft.	21.00
7591052	5 ft.	22.00
7591062	6 ft.	23.00
7591082	8 ft.	24.50
7591102	10 ft.	26.50
7591152	15 ft.	32.00

Standard Rescue Loop

High Strength Continuous Loop

High strength 1" Tubular Webbing (4,500 lbf.) provides a high strength loop. Because of the high strength and abrasion resistance of the Rescue-Spec™ Tubular webbing RescueTECH Standard Rescue Loops will outlast conventional tubular webbing slings. Strength: 7,400 lbf. WLL: 740 lbs. Colors: Assorted.

7612012	12 in.	4.00
7612024	24 in.	6.00
7612036	36 in.	7.00
7612048	48 in.	8.00
7612060	60 in.	8.50

Heavy Duty Anchor Loop

Heavy Duty Continuous Loop

Constructed of same heavy duty webbing as the Anchor Sling. This unit is sewn to form a continuous high strength rigging loop. Items are sold by linear measurement of the loop laid flat. Anchor Loops meet all standards and regulations for two-person life support lines. Tensile Strength: 13,000 lbf. WLL: 1,300 lbs. Color: Yellow. Rating: General Use.

7540042	4 ft.	13.00
7540062	6 ft.	15.00
7540082	8 ft.	17.00
7540102	10 ft.	19.50

Steel Cable Sling

The highest quality life support slings made from flexible 3/8" steel cable. Manufactured with Flemish eye splices with steel swages per OSHA/ANSI standards. Each unit is tagged with date of manufacture, size, and working load in tons. Steel slings are excellent in areas of extreme high/low temperatures, chemical exposure, and abrasion. Proof Tested: 5,400 lbf. WLL: 2,700 lbf. Rating: General Use.

759304	4 ft.	15.00
759306	6 ft.	19.00
759310	10 ft.	25.00
759315	15 ft.	38.00

RescueTECH Webbing

RescueTECH Rescue-Spec Tubular webbing is specially designed for the demands of rescue by exceeding the strength specifications of normal mil-spec webbing. Additionally, it will outwear any comparably sized tubular webbing. Special Lock-Stitch is used to make RescueTECH tubular webbing superior all other tubular webbings - even mil-spec.

For heavy duty rigging conditions, we recommend the use of our Rescue Technology Heavy Duty Flat Webbing. The Heavy Duty Webbing is more abrasion resistant than standard 1" tubular.

TUBULAR		ft.	50 ft.	150 ft.	300 ft.
7900	9/16"	0.28			79.00

1 3/4"	Heavy Duty Flat	6,000 lbf.	Black
2"	Seat Belt Type Flat	6,000 lbf.	Black

Screamer Load Limiter

Multi-functional energy absorbing device. Exceptionally good for use in anchor point protection in any raising or lowering system. The load limiters not only absorb energy when a system is overloaded but they act as a very reliable rescue system overload indicator. The load limiters can be "ganged" to accommodate various activation forces (550, 950, 1200 lbf.). Activation point is consistently repeatable to +/- 7%. Activation Point: 550 lbs Standard. Weight: 2 oz.

753400 Standard Duty 12.60

Rescue Shock Absorber

This is the highly efficient webbing tear-stitch type shock absorber utilized on our lanyards. The Zorber absorbs energy by means of a controlled destruction. Two layers of webbing are woven together in a proscribed manner. Limits OSHA style loads to a maximum force of 900 lbf. Initial Length: 10", Extended Length: 52". Minimum Tensile Strength: 6,000 lbf.

		Weight	
a. 753420	Loop & Loop	9 oz.	27.00
b. 753422	Loop & D Ring	11.2 oz.	40.00
b. 753424	Loop & Snap	15 oz.	42.00
c. 753426	Snap & D Ring	20.9 oz	46.50

Meets all ANSI, OSHA standards and CSA construction requirements.

TECHNote™

RESCUE-SPEC WEBBING
OUTPERFORMS MIL-SPEC
WEBBING

RescueTECH 1" Tubular outlasts other types of 1" Tubular. RescueTECH webbing is stronger (4,300 lbf. vs. 4,000 lbf.), more durable (94% greater abrasion resistance), and exceeds MIL-SPEC 4088, Class 1A.

RescueTECH webbing also has greater strength in knots than mil-spec webbing. Strength tests show that RescueTECH webbing tested at over 7,000 lbf. in a loop joined with a "water knot". Mil-spec webbing tested at just over 5,400 lbf.

RT Daisy Chain

Strong Rigging Loops

Traditional multiple loop rigging sling with "directional" rigging loops for higher strength. Made from 1" Tubular Webbing. Loop strength of 1,500 lbf exceeds that of competing multi-loop straps. Ultimate Strength: 6,800 lbs. Specify Color: 36" Black or Red (9 pockets); 60" Black or Blue (17 pockets).

7581361	Medium, 36" (BK)	16.00
7581364	Medium, 36" (RD)	16.00
7581601	Large, 60" (BK)	21.00
7581606	Large, 60" (BL)	21.00

Deluxe Webbing Ladder

Multi-Unit Connectability

The Deluxe Webbing Ladder offers the features of our traditional 1" Webbing Ladder plus the ability to connect multiple units together. Built in spreader and individual semi-rigid stays keeps the steps open without causing "foot pinching". Multiple ladders may be linked together. 16 steps.

WLL-Step: 300 lbs.
WLL-Unit: 600 lbs.

758625 15 ft. 115.00

Webbing Ladder

The Webbing Ladder offers the simplicity of a traditional 1" etrier but with increased comfort. Built in spreader and individual stays in the steps insures that steps remain open without causing "foot pinching". Built-in wrist loop. 6 steps.

WLL-Step: 300 lbs.
WLL-Unit: 600 lbs.

758621 6 ft. 38.00

Multi-Purpose Rescue Strap

15' strap with forged adjuster buckle. Multiple uses: emergency harness, litter strap, rigging sling. Webbing Strength: 6,000 lbf. Buckle Proof Load: 2,500 lbf. WLL: 600 lbs. Weight: 10 oz. Color: Black.

756128 Multi-Purpose Strap 23.50

RT Rescue Etrier

A great help in rescue. Can be used as a simple step-up or at the breakover by safety personnel. Constructed of 1" flat webbing with a protective sheath at the carabiner rigging point for extra abrasion resistance. Double thickness of webbing keep steps open and hand loop at top. Tensile Strength: 5,000 lbf.

758341	4 Step, Black	25.00
758342	4 Step, Yellow	25.00
758345	4 Step, Green	25.00

758361	6 Step, Black	29.00
758364	6 Step, Red	29.00
758366	6 Step, Blue	29.00

RT Deluxe Rescue Etrier

With Attached Rigging Sling

A modified version of our popular 4 Step Rescue Etrier. We have attached a 24" length of versatile RT Daisy Chain Webbing. Tensile Strength: 5,000 lbf.

758542	Yellow	36.00
758545	Green	36.00

▲ WARNING

Technical rescue and safety is potentially hazardous. Any person using equipment sold by RESCUE TECHNOLOGY in any manner is personally responsible for learning the proper techniques involved, and assumes all risks and accepts full and complete responsibility for any and all damages or injury of any kind, including death, which may result from the use of any RESCUE TECHNOLOGY equipment.

SkyHook Rescue Winch

The SkyHook system is comprised of an anodized aluminum two-speed self-tailing winch, handle, and mounting system. Will connect to the Sked Evac or Sure-Strong Tripods. Offers ease of raising & hauling loads without the use of bulky block & tackle-style mechanical advantage systems. Best used with 1/2" ropes. Weight 21.5 lbs.

615201 SkyHook Rescue Winch 2,700.00

▲ WARNING

Technical rescue and safety is potentially hazardous. Any person using equipment sold by RESCUE TECHNOLOGY in any manner is personally responsible for learning the proper techniques involved, and assumes all risks and accepts full and complete responsibility for any and all damages or injury of any kind, including death, which may result from the use of any RESCUE TECHNOLOGY equipment.

SkyHook Receiver Hitch Mount

Allows the SkyHook winch to be mounted to a vehicle using a standard receiver hitch. The mount will pivot up to 45° in each horizontal direction to achieve proper rigging alignment.

615202 Receiver Hitch Mount 530.00

SkyHook "T" Off-Road Foundation

This attachment gives the winch a large base for ground operations. Weight: 4.8

615204 Ground Stabilizing Mount 225.00

SkyHook Case

Holds winch and winch drive system as well as Universal Anchor Plate.

615209 Skyhook Case 700.00

SkyHook Power Drive

An electric powered power head turns the winch head. Includes Power Drive, stainless steel drive bit, attachment bracket, and storage box. 110 VAC. Weight: 15.5 lbs. (With case: 21.2)

615210 Skyhook Power Drive 875.00

SkyHook Universal Anchor Plate

Provides the winch a stable work platform for anchoring the winch to the ground, telephone poles, etc. Weight: 9.7 lbs.

615205 Universal Anchor Plate 318.00

Skyhook Web Anchors

The SkyHook Web Anchor Set allows rescuers to quickly attach the Skyhook winch around a column, tree, abutment, etc. Very useful in Industrial and rural applications. Strong ratchet adjusters provide a tight and secure attachment.

615206 95.00

Original Arizona Vortex

Kit Includes Feet

The Arizona Vortex is a fixed A-frame design with third rotating (easel type) leg. It can be used as a tripod or A-frame. The two-piece legs allow multiple adjustment of upper leg in 6.5" increments. The single section Short Tripod configuration as an inside working clearance of 41". The two-section Standard Tripod has an inside working clearance of 80". With the optional Extra Lower Leg Set, the inside working clearance is 120". The feet are "clawed" with hardened tool steel for excellent holding capability on a variety of surfaces.

Optional Chain Set allows legs to be attached to bolts in floor or rock and

prevents legs from spreading. The Arizona Vortex is packaged in custom designed duffel bags for ease of transport. Weight: 65 lbs.

6198101	Arizona Vortex	3,550.00
6198104	Anchor Chain Set	85.00
6198103	Extra Lower Leg Set	225.00
2317101	Extra Claw Foot	190.00
2317103	Extra Point for Claw Foot	16.00
2317105	Extra Flat Foot	135.00

INCLUDED:
*Raptor Claw
Foot digs into
rock using tool
steel point.*

*Head allows third leg to rotate
perpendicular to the other legs*

The Original Arizona Vortex includes:

- 1 Head with Carrying Bag
- 3 Upper Legs with Carrying Bag
- 4 Lower Legs with Carrying Bag
- 3 Flat Feet
- 3 Claw Feet with Tips
- 13 Pins with Bag
- 1 Instruction Manual

Larkin Rescue Frame

An uneven tetrahedron that can replace a tripod or a small rooftop derrick crane for personnel lifting/lowering. The Larkin Frame swivels on its feet and can be set up as a standard tripod or tipped as shown in the photo to reach over an edge or parapet wall. It is especially useful on horizontal tanks with half walkways. The two feet must be secured to prevent slippage away from the breakover when the unit is tipped. Safe Working Load: 600 lbs. Dimensions: 8' x 10'. Weight: 75 lbs. (Shipping Weight: 80 lbs.) Made in Australia. Patented

900200 Larkin Frame 3,700.00

Requires Cable Pulley and Autolocking Carabiner

Sure-Strong™ Winch

The Sure-Strong™ Winch is used in conjunction with the fall protection system and Sure-Strong Tripod for suspended work positioning, material handling, and as a means of retrieval in an emergency. If the winch is used to lower personnel into a confined space, a backup lifeline must also be attached to the person. The winch comes with a snap-on mounting bracket and attached locking pin. Raises and lowers (minimum 25 lbs.) by simply reversing the cranking direction of the removable handle. Each winch comes with a line weight and double locking swivel hook. Cable: 3/16" galvanized. Rescue Load: 600 lbs.

		Gear Ratio	Weight	
6197050	50 ft.	2.85:1	22 lbs.	900.00

61945059	Padded Winch Bag			60.00

Sure-Strong Tripod with Optional Winch, Pulley.

Sure-Strong™ Tripod

High Strength for 2 Person Loads

Lightweight, aluminum, telescoping tripod that meets NFPA, OSHA, ANSI, and CSA strength standards. The unit contains no cast parts and has two anchor points for application flexibility. Special locking mechanism prevents the legs from collapsing while loaded. The included leg security straps increase the tripods full extension strength to an amazing 10,000 lbf. Optional Rigging Bracket provides extra rigging point and allows user to tie-back head of tripod for use as a bipod. The hole alignment of the legs provides for easy set-up and accommodates the snap-on brackets of the Sure-Strong Winch and recovery/retracting lifelines. Baked orange enamel finish.

Leg Rigging Bracket

Special bracket that provides an additional rigging point for safety lines or pulleys. Also designed for use as a tie-back point for stabilizing the tripod when off-center loads are encountered. Alloy aluminum construction. WLL: 600 lbs. Weight: 25.8 oz.

6192107	Leg Rigging Bracket	105.00
---------	---------------------	--------

Retracting / Recovery '3-Way' Lifeline

For Use with Sure-Strong Tripod

The Retracting/Recovery Lifeline is designed to safely arrest a fall and then, by simply switching to the recovery mode, retrieve the worker. The Retracting/Recovery provides the same benefits and capabilities as the Retracting Lifeline. The Retracting / Recovery "3-Way" lifeline is a fall protection device with a built-in emergency recovery winch. A separate work winch is required for non-emergency lifting. Requires Mounting Bracket to attach to Sure-Strong Tripod leg.

		Weight	
618050	50 ft. Cable	34 lbs.	1,835.00
618095	95 ft. Cable	54 lbs.	2,409.00
618050M	Mounting Bracket, 50 ft.	8 lbs.	245.00
618095M	Mounting Bracket, 95 ft.	8 lbs.	252.00

Meets ANSI Z359.1-1992, CSA Z259.2.

RescueTECH Technician Tripod

2 Swivelling Rigging points. Spring loaded leg locking mechanisms hold legs in place. Sheaves on head of tripod allow for integration of winches and fall blocks while allowing for increased height under the tripod head. Extruded head and snap out legs for quick and positive deployment. Available with optional load indicating attachment eyes. Manufactured from high strength alloy aluminum and stainless steel fittings.

Fall Protection Lifeline

Great Fall Protection Block for worker and rescuer protection. Meets ANSI and CE Personal Protection Equipment standards.

61942050	Fall Block x 50 ft.	1,000.00
60511730	Autolocking Carabiner	22.00

Webbing Lanyards

Manufactured from heavy duty 1" wide nylon webbing and two double locking snaps at each end. Minimum Tensile Strength: 5,000 lbf. New labeling and easier to use autolocking snap.

752042	2 ft. Lanyard	25.00
752043	3 ft. Lanyard	26.00
752044	4 ft. Lanyard	27.00
752046	6 ft. Lanyard	28.00

Meets all ANSI, OSHA standards and CSA construction requirements.

Webbing Lanyards with Ladder Hook

Manufactured from heavy duty 1" wide nylon webbing with a double locking snap at one end and a double locking ladder hook (2.5" gate opening) at the other end. Minimum Tensile Strength: 5,000 lbf. Now available with integral shock absorber (Zorber™). New labeling.

752056	6 ft., Snap / Hook (shown)	65.00
752348	3-6 ft., Adjustable, Snap / Hook	65.00

Meets all ANSI, OSHA standards and CSA construction requirements.

Webbing Lanyards with Shock Absorber

Lanyards that combine special shock absorber with one of the strongest webbings (10,000 lbf.) available. Webbing features cut indicators on each edge.

753574	4 ft.	60.00
753576	6 ft.	62.00
752346	3 - 6 ft., Adjustable	40.00

Meets all ANSI, OSHA standards and CSA construction requirements

Twin Leg Tower Lanyard, AutoLock

Twin Leg Tower Lanyards 100% Tie Off

Special design Lanyard with Zorber to be used for 100% tie-off method of climbing safety. One end has a double-locking safety snap or rapid link that attaches to harnesses. The "Legs" of the lanyard are complete with large 2.50" opening double locking Ladder Hooks.

752265	AutoLock, Steel	85.00
752265A	Aluminum Autolock, Aluminum	125.00
752275	Aluminum with Rapid Link	90.00
752264	AutoLock with Shock Absorber	135.00

Meets all ANSI, OSHA standards and CSA construction requirements.

Shock Absorbing Lanyards with Ladder Hook

Manufactured from heavy duty 1" wide nylon webbing with a double locking snap at one end and a double locking ladder hook (2.5" gate opening) at the other end. Minimum Tensile Strength: 5,000 lbf. Manufactured with integral shock absorber (Zorber™).

752156	6 ft., Snap / Hook / Zorber	100.00
---------------	-----------------------------	--------

Meets all ANSI, OSHA standards and CSA construction requirements.

Adjustable Tower Strap w/ Shock Absorber

Ideal for Tower/Ladder operations.

The Tower Strap allows the firefighter enough length to complete ventilation or perform window rescues while remaining secured to the bucket or ladder. Used in conjunction with the Truck / Escape Belt or Ladderman's Class II Harness. Adjusts from 4 - 6 ft. and equipped with autolocking snap and ladder hook. Integral Zorber shock absorber limits forces in case of fall. Notice: This product must be protected from temperatures above 250 degrees fahrenheit and direct flame impingement. (Use Fire Resistant Truck Lanyard if in doubt of heat resistant needs)

609015	Adjustable Tower Strap	92.00
---------------	------------------------	-------

SITE

Work Positioning Lanyard

The work positioning lanyard with great handling makes your work safe and efficient. 11mm rope sewn-in unopenable version of LOCKER - rope clamp. Rope covered with tubular webbing to increase wear resistance. Parking cam for locking in required position.

238910112	78 inch	155.00
238910114	157 inch	175.00

Lanyard "I"

Made from super-durable 11mm kernmantle rope. Ideal for rope access technicians. Lengths are color-coded at the ends.

23892110060	24 inch	25.00
23892120080	32 inch	27.00

Retracting Lanyard

The retractable lanyard is designed to protect personnel working at high levels from falling. The user is attached to the tensioned synthetic webbing enclosed in the drum housing that is attached to an approved anchorage point*. The webbing retracts automatically providing the worker freedom of movement. Should the worker fall, the inertia locking system engages to arrest the fall.

		Weight	
616007	10 ft. Lanyard	42 oz.	154.92

Certified CSA X259.2-M Type 1, Class C.

*Anchorage point must be above connection point on users belt or harness.

Reactor "Y"

Ideal for Rope Access

A Twin-Leg static kernmantle rope lanyard with and integrated webbing shock absorber. 1000 lbf. maximum impact force. Complete with Ladder Hooks with 2.25" gate opening. 500 activation force. Minimum breaking strength: 3375 lbf..

2389441155	Reactor "Y", 62 in.	175.00
------------	---------------------	--------

Steel Cable Grab

Only For Use on 3/8" Steel Cable

Designed for use on 3/8" diameter steel cable. Manufactured from steel for durability. Can be attached and removed from the cable at any point. Slight spring tension keeps the unit in the locked position unless upward pressure is applied to the pivot arm. Exceeds applicable OSHA/ANSI regulations. Weight: 34 oz.

602700	Steel Cable Grab	150.00
--------	------------------	--------

Reactor "I"

A Single Leg static kernmantle rope lanyard with an integrated webbing shock absorber. Complete with 1 autolocking lanyard hook. 1000 lbf maximum impact force. 500 activation force. Minimum breaking strength: 3375 lbf..

2389422155	Reactor "I", 62 in.	85.00
------------	---------------------	-------

Access Lanyard "V"

Tested to EN 354 standard for lanyards. It is used for working at height, especially for self-protection when moving from one place to another. The middle loop is attached to the harness with carabiners and energy-absorbing device. Shrink tubing protects each seam. Lanyard V has to be used as a component of a fall arrest system.

RT Extra-Wide Stokes

For those special rescues where the basic sized stretcher will not work. 32" wide at the rail and lined with our 0.25" diamond pattern durathene mesh. Included 4 rescue-grade patient straps*. Dimensions: 85" x 32" x 8". Weight: 33 lbs.

620125 750.00

*does not replace proper patient packaging using backboard, cervical collar, and headblocks.

Lexan Cover

Confined Space Stokes Stretcher

An updated version of the traditional wire mesh stretcher. This version features our popular 0.25" durathene mesh insert and rescue-grade straps. Tested to 1500 lbs. Dimensions: 81 1/2" x 18 3/8" x 7 3/4". Weight: 23 lbs. Shipped via motor freight.

620113 299.00

*does not replace proper patient packaging using backboard, cervical collar, and headblocks.

Stretcher Trailer

Aluminum Litter Trailer for litter transport. Easily disassembles for storage. Nylon Powder Coated. Sets up in approximately 3 minutes. Ground Clearance: 21". Length: 72". Width: 27" or 40". Weight: 71 lbs. Litter not included.

620350	Stretcher Trailer	1,450.00
620355	ATV Adapter Kit	525.00

ATV Adapter Kit

ATR2 Rescue Trailer

The All Terrain Res-Q 2 model was designed for those with limited storage space. The ATR2 features a fully welded chassis made from durable rectangular tubing and schedule 40 pipe with a suspension system consisting of hydraulic assist shocks and coil spring. Towable behind a ATV via the dual hitch configuration. If the ATV does not have a 1-7/8 inch ball, you just slide the hitch out and reverse it and you can attach via standard draw pin style. Standard features are: Split frame with locking pin, Dual Hitch System, 22 x 11 x 8 ATV Tires, Stainless Steel IV Pole, Standard Hubs on Axle, Dual Ratchet Style Straps for attaching stokes litters, 750# capacity coil spring, hydraulic assist shocks. Folds for storage (46"w x 36"d x 63"h). U.S. Patent: 7,131,666.

2394111	Medic Seat	375.00	2394115	Medical Tray	300.00

RescueTECH Tapered Stokes Stretcher

The RT Stretcher provides an economical choice for the rescue professional. Cold Rolled tubing and a full length steel strip backing for strength and rigidity. Shipped via motor freight.

- .25" Diamond Mesh insert
- Full length steel strips provide backboard-like rigidity*
- Rescue-Grade Patient Straps
- Electrostatic Powder Coat Finish

620112 Tapered Stokes Stretcher 299.00

**does not replace proper patient packaging using backboard, cervical collar, and headblocks.*

Rectangular Stokes Stretcher

The Rectangular Stretcher builds on our popular Tapered Stretcher design. It is designed to be symmetrical from end-to-end and to allow larger sized, rectangular backboards to easily fit inside. Cold Rolled tubing and a full length steel strip backing for strength and rigidity. Shipped via motor freight.

- .25" Diamond Mesh insert
- Full length steel strips provide backboard-like rigidity*
- Rescue-Grade Patient Straps
- Electrostatic Powder Coat Finish

620114 Rectangular Stokes Stretcher 305.00

**does not replace proper patient packaging using backboard, cervical collar, and headblocks.*

Stainless Steel Rectangular Stokes Stretcher

A stainless steel version of our Rectangular Stokes Stretcher. Includes a special Mesh insert with a .25" diamond pattern for greater strength, and better patient packaging than .5" patterns. A new style ABS back plate provides a sturdy, yet comfortable base for the patient. We have also added rescue-grade nylon Quick-Fit Stretcher Straps for securing the patient. Shipped via motor freight.

620124 S.S. Rectangular Stokes 590.00

**does not replace proper patient packaging using backboard, cervical collar, and headblocks.*

Stainless Steel Tapered Stokes Stretcher Super Strong to meet Mil-Spec

We designed this stretcher based upon Junkin's top of the line Military Stainless Steel stretcher. This stretcher meets the Mil-Spec 2,500 lb load rating - tested from the ends of the stretcher to give a more accurate measure of strength*. We add a special Mesh insert with a .25" diamond pattern for greater strength, and better patient packaging than .5" patterns. A new style ABS back plate** provides a sturdy, yet comfortable base for the patient. We have also added rescue-grade nylon Quick-Fit Stretcher Straps for securing the patient. Shipped via motor freight.

620122 S.S. Tapered Stokes 590.00

**Other brands test from rigging points to give an artificially higher strength rating rather than the required Mil-Spec Strength rating.*

***Does not replace proper patient packaging using backboard, cervical collar, and headblocks.*

▲ WARNING

Technical rescue and safety is potentially hazardous. Mass Casualty Flexible Stretcher

Constructed of specially compounded orange or gray 18oz. vinyl-coated nylon that is easily washed with soap and water.

- Highly resistant to acids, alkalis and penetration of liquids
- Five (5) removable hardwood slats positioned between two layers of the 18oz. fabric provide strength and rigidity
- Shorter slats are placed in torso area only to make stretcher lighter and more compact
- Lightweight – 13lbs.
- Compact and portable – opens to 78"L x 28"W; closes to 35"L x 6"W
- Six (6) handles ergonomically placed for ease of transport
- Three (3) polypropylene web patient security straps for immobilization
- Load capacity – 350lbs.
- Carry bag with shoulder strap
- One person can carry up to ten (10) of these stretchers when responding to an incident

2070104	Orange	235.00
20701047	Grey	235.00

Stadium Seat

For use in fast, safe transportation of victims from stadiums, sport facilities, arenas, theaters, or anywhere multiple steps create problems in removing patients.

- Lightweight - weighs only 4.5 lbs.
- Strong - accommodates up to 350 lbs.
- Durable - made of 18oz. vinyl and hardwood slats
- Compact - folds to 20" x 7" packaged in carrying bag
- Safe - 2 nylon seat belts secures patient
- Portable - can be stored in a minimum of space
- Easy to use - 5 web handles for lifting and carrying

----------	--------

Stainless Steel Rectangular Litter

This new heavy duty stretcher combines the stability of the military steel wire basket stretcher with the space needed for a full size rectangular backboard. This is an extremely sturdy lightweight stretcher. Dimensions: 84" x 23.5" x 8". Weight: 31 lbs. Shipped via motor freight. Tested per Mil-Spec to 2,500 lbf.

620120	Stainless Steel Rectangular Stretcher (JSA-8131W-Miami)	585.00
--------	---	--------

Stainless Steel Military Litter

The stretcher used by all branches of the U.S. Military. It is a heavy duty bridge truss design of stainless steel. The wire mesh is replaceable in this stretcher. This stretcher has NO leg divider so a tapered backboard can be used. Length: 83". Widths: 24" chest, 23" abdomen, 21" calf. Weight: 30 lbs. Shipped via motor freight. Tested per Mil-Spec to 2,500 lbf.

620121	Military (JSA-8131W)	585.00
620123	Military, 2 Piece	655.00

Confined Space Litter

A narrow version of the Wire Basket Stretcher. Only 19" wide and fits through nearly all accessible manholes. Used with either 4 or 6 point litter bridles. Hexagon mesh wire netting. Tested to 1500 lbs. Dimensions: 81 1/2" x 18 3/8" x 7 3/4". Weight: 23 lbs. Shipped via motor freight.

620103	Confined Space (JSA-300CS)	306.00
--------	----------------------------	--------

Wire Basket Stretcher

Traditional design wire basket stretcher manufactured from rugged 5/8" tubular steel frame with 3/16" x 3/4" flat wire braces. Hexagon mesh netting (18 gauge). Used with either 4 or 6 point litter bridle. Tested to 1500 lbs. Length: 80.5". Widths: 22 1/2" chest, 22" abdomen, 21.5" thigh, 20.5" calf. Height: 8". Weight: 31 lbs. Shipped via motor freight.

620101 Wire Basket Litter (JSA-300W) 255.00

Plastic Stretcher

The Plastic Stretcher combines the open top railing desirable on standard wire basket litters with the plastic bottom desired for smooth transport. Made from yellow, high density polyethylene shell, supported by a Stainless Steel outer rail. Shell is permanently attached to rail using semi-tubular Stainless Steel rivets (not pop rivets). Steel rail facilitates handling of the stretcher at all points along sides and ends of stretcher. Includes molded runners and a sealed, closed cell foam pad. The Plastic Stretcher will accept a full size rectangular backboard. Load capacity: 1,200 lbf. Dimensions: 84.5" x 24" x 7.5". Weight: 31 lbs. Color: Yellow. Shipped via motor freight.

620115 Plastic Stretcher (JSA-200) 595.00

Basket Stretcher Flotation Kit

For use with all basket stretchers to provide flotation during patient handling in water. Easily attached with hook and loop fastener to any Stokes type stretcher. Flotation bats are Dow EthaFoam and covered in Cordura™ Nylon. Kit is ready to attach to any Junkin stretcher. Weight: 3 lbs. Color: Orange.

620321 Flotation Kit 377.00

3 in 1 Basket Litter

Bradco Full Body Restraint System

Designed to securely hold patients in a suspended litter bed with wrap-around slings and patient envelope. Replaceable exterior shell protects the litter frame. Excellent for sliding through brush and rocks. Tested to U.S. Army specs. Supports over 2,500 lbf. Weight 22 lbs. Dimensions: 81" x 25" x 8". Shipped via motor freight.

620105 3 in 1 Basket Litter 1,390.00

Patient Stokes Harness

Special design harness that provides inside patient lashing. Designed to stay attached to stretcher then attached to patient. Complete with chest and seat harness section. Easily donned. **To be used in addition to a rescue-grade wire basket or plastic stretcher with proper technical rescue patient lashing.**

6201540 Patient Stokes Harness 110.00

Stretcher Equipment Pack Holds all Harness and Hardware

A new equipment pack designed to hold all items needed for securing patient and stretcher movement in a vertical environment. Two zippered pockets hold webbing, hardware, litter bridles, victim harnesses,

and much more (not included). Come complete with carrying handle. Stretcher attachment system is complete with high strength buckles. Dimensions: 18" x 10" x 5"

620172 Stretcher Equipment Pack 51.00

*Manikin and Stokes not included

Quick-Fit™ Patient Packaging Set

Complete system for patient restraint in the vertical environment. Set includes Stokes Harness, Patient Lashing Set, and Stretcher Equipment pack.

299842121 250.00

Quick-Fit™ Stokes Lashing Set

Packaged set of RescueTECH's Quick-Fit Stretcher Straps. Provides rescue-grade outside lashing for the vertical environment. Complete with 4 red and 1 Yellow strap and storage pouch.

6201530 Stokes Lashing Set 87.50

Stretcher not included

Litter Cover

Protects Stretcher from the Elements

Manufactured from durable vinyl coated polyester for extra strength and durability. Double stitched seams and Vislon Zipper. Compression straps secure the bag to the stretcher. Zippered opening of 1/2 of the top panel eases insertion of the stretcher. Dimensions of 90" x 30" x 10" fits all standard and confined space stretchers.

620175 Litter Cover 135.00

Litter Transfer Sling

A handy adjustable sling that attaches to litter railing with a girth hitch. Similar in design to our standard transfer sling. V-ring adjuster attaches to rescuer. Great for litter transport. Extended Length: 40 in. Weight: 8 oz.

756111 Litter Transfer Sling 24.00

Handle Set &
Stretcher not included

Mule Litter Wheel

The new Mule Litter Wheel is designed to be truly "universal", and accepts any type and style of rigid litter. The single-wheel design allows for ease of movement in the roughest terrain. Ideally suited for narrow rough trails giving the patient a smooth ride even across slopes. The two securing straps (2 hooks per strap) are each rated to 1,000 lbf. and use a strong and durable ratchet-locking device. The hooks at the end of each securing strap have a one-inch diameter opening which allows you to attach them to any style litter on the market today.

620360 Mule Litter Wheel 800.00

Stretcher not included

Mule Litter Wheel with Handles

This is a modified version of the Original MULE Litter Wheel that adds Handles to both ends of the unit. The single-wheel design allows for ease of movement in the roughest terrain. Ideally suited for narrow rough trails giving the patient a smooth ride even across slopes. The two securing straps (2 hooks per strap) are each rated to 1,000 lbf. and use a strong and durable ratchet-locking device.

620361 Mule Litter Wheel w/ Handle 1,200.00

Emergency Blanket

Known for years as a Space Blanket, this mylar sheet works great as a thermal insulator. Small enough to fit in your shirt pocket, yet opens to a full 56" x 84" size. Stays flexible in freezing temperatures. Wind and waterproof. Weight: 1.5 oz.

2282127032 2.85

Heavy Duty Space Blanket

Lightweight Superinsulator

Reflects and retains up to 80% of radiated body heat to prevent post trauma shock resulting from an accident or natural disaster. Waterproof, windproof and durable. Multiple layers are flexible even in sub-freezing temperatures. Dimensions: 60' x 84'. Weight: 12 oz.

620165 Heavy Duty Space Blanket 17.00

Stretcher Blanket

Traditional Packaging Tool

The finest cot and stretcher blanket available for patient packaging. Provides excellent insulation characteristics. Note: Proper basket litter operations require a minimum of two blankets. 70% Wool, 30% Synthetic Fiber. Size: 82" x 62". Weight: 2.75 lbs.

620160 Stretcher Blanket 36.00

Adjustable Litter Bridle

Vertical, Horizontal, and Low Angle Lifting

Same as our original 4-Point Litter Bridle but with 1 3/4" forged adjusters. Adjusters allow for independent adjustment of the four support straps during rescue. Complete with 3" forged "O" ring and 4 locking litter snaps. Heavy Duty Version features a 30,000 lbf. lifting ring. Also available without snaps to use with heavy duty carabiners for litter attachment. Converts for low angle use. Tensile Strength: 5,000 lbf. Color: Orange with contrasting straps. We suggest the 60511820 RescueTECH Large D, Steel Carabiner. Bridle Kit includes: Bridle, Tender Rope and Carrying Bag.

		Weight	
620185	Bridle with Snaps	6 lbs.	180.00
620188	Bridle WITHOUT Snaps	2.3 lbs.	125.00
620189	Bridle Kit WITHOUT Snaps	5 lbs.	155.00
620189S	Bridle Kit w/ Snaps	9 lbs.	205.00

2-Piece Litter Pre-Rig

The Pre-Rig is a fully adjustable bridle intended for use with any stokes litter. The unique "Y" suspension system drastically reduces congestion at the upper attachment point. Adjustable to a minimum height of 18" above the litter for the tightest helicopter evacuations and a maximum length of 5 feet. One half of the Pre-Rig can be used as a low angle evacuation stretcher harness, eliminating the need to purchase separate harnesses. Combines with a rescuer rigging rope or Transfer Sling for a complete litter/rescuer system. Litter Pre-Rig is made of 6,500 lbf. webbing and quick adjust Mil-Spec forged hardware. Strength: 5,000 lbf. All webbing and hardware meet NFPA strength specifications. Weight: 2.75 lbs.

620183	2 Piece Litter Pre-Rig	105.00
--------	------------------------	--------

Convertible Litter Bridle

Vertical, Horizontal, and Low Angle Lifting

Ideal for all standard lifting applications. Designed for single rope rigging, the 4-Point Litter Bridle attaches directly to the railing of all types of stretchers. Two 1" heavy duty type 18 nylon slings (Webbing Strength: 6000 lbf.) are looped through a 3" forged steel lifting ring to allow end-to-end height adjustment. Connects to litter with four forged locking snap links (included). WLL: 600 lbs. Weight: 5 lbs. Color: Red.

620180	4-Point Convertible Litter Bridle	130.00
--------	-----------------------------------	--------

Low-Angle Litter Bridle

Ideal for scree-slope and other low angle litter operations. Provides stable, secure connection. Manufactured of high strength webbing and forged steel hardware. Attaches to sides and end of litter. Strength: 5,100 lbs. Weight: 1.5 lbs. Color: Black.

620181	Low-Angle Litter Bridle	70.00

Triple X Backboard Strap™ Innovative Design from Conterra

New strap system that has twelve separate overlapping Velcro® straps that quickly and securely immobilize a spine injured patient to virtually any spine board. Easy deployment. Simply align the three sets of "X" formation straps over the corresponding weight centers of the body (upper chest, pelvis, legs). Thread tie straps through the backboard holes and pull tight. Machine washable 2" webbing, 1.5" velcro. Reflective striping on center alignment strap. Complete with zippered carrying case. Weight: 28 oz.

621131	Triple X BackBoard Strap	95.95
--------	--------------------------	-------

Reeves Sleeve

Immobilizes Patients for Transport

A unique product that converts a full size backboard into a patient immobilization device to be used for vertical and horizontal lifting. Perfect device for confined space rescue because it fits over the backboard (not included). DOES NOT CAUSE FEET TO ANGLE OUTWARD as do popular plastic lifting devices. Sleeve material is a vinyl laminated nylon that meets Mil Spec C 4300 Type 1, Class 1 anti-fungal vinyl and is resistant to acids, alkalies, and liquids. Lifting straps are constructed from 6,000 lbf. Tensile Strength webbing. Reeves Sleeve II has extra webbing reinforcement for greater strength. Storage Dimensions: 24" x 12" x 5". Full Dimensions: 73" x 24". Weight: 14 lbs. Color: Orange.

620401	Reeves Sleeve	445.00
620401S	Reeves Sleeve, Metal Buckles	550.00
620401R	Reeves Sleeve, Reinforced	475.00

620402	Reeves Sleeve II	572.00
20700049	Replacement Head/Chin Strap	17.00

Note: This product, when used with a quality backboard, provides the best medical access of any confined space immobilization devices.

Reeves Sleeve Drag Version

A special conversion of the traditional Reeves Sleeve that adds a special drag sheet. The sheet reduces drag and protects the sleeve in rough environments.

620403	Reeves Sleeve Drag Version	605.00
---------------	----------------------------	--------

SPEC Pak™

Improved - Now with Void Filling Foam Blocks

Unique Patient Packaging and Extrication System combines' backboard immobilization of a "Short Board" along with the suspension and support of a full body harness. The PAK System utilizes an integrated polyethylene board along the back of the harness system to reduce wear and allow for a smooth sliding surface for confined space operations. Grab handles located on the sides and head of PAK aid rescuers during movement of patient through confined spaces. Pack System is very useful for any confined space operations where a vertical environment is encountered. SPEC PAK is a fully certified lifting harness (ANSI Z359.1-1992), thus eliminating the need for a separate victim harness. Unique self-adjusting cervical restraint eliminates the problem associated with lifting patients vertically while secured to a rigid backboard. NEW head pad system helps prevent hyper-extension of cervical area. SPEC PAK is only intended as a limited spinal immobilization system. SPEC PAK must be used with proper spinal immobilization such as the use of a "Cervical Collar" where conditions and protocols dictate.

620410	SPEC Pak	1,125.00
---------------	----------	----------

LSP Half Back™

A versatile short body immobilization board designed for suspected cervical/spinal injuries during confined space rescues. Leg straps support lower body during lifting. 6 handles. Closed cell foam interior and metal back stay. Weight: 11 lbs.

2322710	LSP Half Back	950.00
2322711	Vertical Lift Straps for LSP	135.00
2322716	Half Back Carrying Case	125.90

Miller Body Splint™

Complete with a full head and body restraint harness. Rigid foam core provides both strength and buoyancy (will float 250 lbs. in fresh water.) Split leg design.

2154700	Miller Body Splint	735.00
2154720016	Carrying Case	175.00

Oregon Spine Splint II

Absolutely the best spinal immobilization / extraction device available. Preferred to K.E.D., XP-1, and LSP. It immobilizes the spine and the shoulders at the same time.

When applied it allows easy access to the patient's chest or abdomen for treatment or diagnosis. The chest straps hold the patient more securely than other devices, but does not restrict breathing. It folds up extremely small to fit in its carrying bag. Non-absorbing materials for easy cleaning. Weight: 10.6 lbs.

620500	Orange (SK-300-OR)	212.50
6205000D	Olive Green (SK-300-OD)	212.50

Sked Haz-Mat

A SKED designed for mass casualty and Haz-Mat Use. Complete with cut-in hand holds and disposable slings. Stretcher is easily decontaminated.

General Purpose Training Manikin

More Realistic Performance / Weight Vest Provides Variable Weight

Rugged, realistic in size, weight distribution and handling characteristics. Manufactured using a flexible inner core, an outer shell, and protective overall. The inner core is weighted to human proportions using 4.4 lb weight packets. For structural integrity, the packets are sewn to a nylon "inner dummy" with all the body parts (arms, legs, chest, etc.) held in place with webbing. The outer layer is 15 oz. Rot-resistant Canvas. All seams are double stitched and reinforced with webbing for improved abrasion resistance. The included protective coveralls protect the manikin from dirt and abrasion and are reinforced with high strength webbing in high stress areas. All manikin 44 lbs and up are supplied with lug sole boots that are secured to the manikin. Optional weight vest fits underneath the coverall and allows weight to be added or removed as needed to achieve the desired Manikin weight.

Manikin Storage Bag

A custom-designed bag to fit the youth - Heavy Adult Sized RescueTECH Training Manikins. Features Heavy Duty PVC material and nylon straps. Includes Shoulder straps and end lifting handles

23959104 Storage Bag, Youth / Adult 75.00

Water Rescue Manikin

Built to the same tough construction standard as the General Use Manikin, the water rescue is built to simulate an unconscious victim in the water, floating at an angle of 45 degrees with just the head and shoulders above the water. The head is color-coded with a yellow "face". Strong plastic strips in the manikin run from the shoulders to the knee and maintain overall flexibility but don't allow the manikin to "flop" in half. The outer carcass is constructed of heavy duty open mesh reinforced with webbing. Additional weight may be placed in special pouches to allow the manikin to sink. Available in Man-Overboard Orange w/ SOLAS reflective strips or Search and Rescue Black. Adult: 5'11"; Youth: 4'3".

23952040	Adult, Orange	88 lbs.	975.00

Training Manikin Weight Vest

For Adult Training manikin

Special Low-Profile design fits underneath manikin coveralls. Quickly and securely fitted to manikin. Allows one manikin to do the work of many. Now, both heavy and lightweight training needs may be met with a single manikin. (Shown outside of coveralls for clarity).

23959215	15 lbs.	110.00
23959225	25 lbs.	145.00
23969236	36 lbs.	190.00

FR Training Manikin

Fire Resistant Body and Coveralls

This high quality, flame resistant manikin demonstrates a balance between temperature and abrasion resistance. Constructed using a blend of Kevlar/Nomex for the inner core and Kevlar for the outer carcass. The protective coveralls are made using PBI Gold which provides excellent heat and abrasion resistance. All FR training manikin are now fitted with heat resistant Firefighters safety boots supplied by Hunter boots, the boots greatly extend the life of the dummy protecting the legs if the dummy is dragged along the ground. Height: 5' 11".

21541115X	40 lbs.	220.00

Multi-Trauma Training Manikin

The Multi-Trauma Rescue Manikin evolved from the Blast and Impaled Victim manikin to combine all the features of these manikin in one product. Additionally, the head has been redesigned to allow the fitting of an extrication collar. So now you have in one manikin a General Purpose rescue manikin that can also simulate an amputated arm and leg, an impaled torso and a suspect neck injury. The hole on the left of the torso allows a spike to be firmly held in place. The right arm and right leg are fully detachable to simulate an amputation, or by partially releasing the locking straps the limb can be weakly attached and will fall off if the rescuer does not correctly assess and support the injury. The manikin is supplied complete with sturdy boots that greatly protect the legs if the manikin is dragged along the ground, and are user-replaceable if badly damaged.

Includes Coveralls & Boots

23956030	66 lbs.	1,125.00
23956050	110 lbs.	1,200.00

"Large Gentleman" Bariatric Training Manikins

400 lbs of Realistic Flabby Performance

Designed to achieve a 'fluidity of movement' that simulates an obese patient. The Large Gentleman is based around a 220 lb General Purpose Manikin, the extra bulk is built up with several weighted layers separated by Nylon coated padding. Rather than just adding a 180 lb. 'lump', we have distributed the extra weight around the body in 170 x 1 lb. packets of steel shot (a very time consuming process!). The Nylon coating on the padding allows the different layers to slip and slide over each other creating a real feeling of 'flabby skin'. Includes reinforced coveralls and Boots **AND** Drag Sheet. Weight: 400 lbs. approx. Ships via Motor Freight Only

23951180	Large Gentleman	4,200.00

Haz-Mat Rescue Decon Manikin

Heavy Duty, Water Resistant Outer Shell

The HazMat Rescue Training Manikin is based upon our popular General Purpose Training Manikin. Available in 66 lb. and 110 lb. models. The internal construction is basically identical to the General Purpose Manikin, but the HazMat Manikin has an outer carcass made from tough, nylon reinforced PVC. This material is designed to withstand being heavily doused with water during a chemical spillage exercise or laying in water during a storm water drain or cave rescue exercise. In fact, it is useful in any scenario where the manikin has to endure a constantly wet environment. The HazMat Manikin has no flotation so where scenarios are in deep water, the use of our Water Rescue Manikin is indicated. Supplied with a coverall of polyurethane coated polyester with polypropylene webbing in high stress areas. At the end of the exercise, simply hose down the whole manikin and hang up using the integral lifting look at the back. Replaceable reinforced coveralls and Lug-Sole Boots. Anatomical Head.

Flexible Rescue Randy

This regular-sized Rescue Randy unit has been developed especially for the aero-space industry and wing tank fuel cell rescue training, but it can be utilized in any confined space rescue. It exceeds the flexibility of the Regular Rescue Randy products (1300 series item numbers) because the waist flexes and the head twists to allow positioning of the manikin under dashboards, in tight spots, and under things where the Regular Randy will not go. Flexible 5 ft. 5" Rescue Randy. Size: 50" x 21" x 12". Shipping Weight: 60 lbs.

21542710

820.00

Randy Intervention Truss

Designed with the Rapid intervention Team (RIT) and confined space rescues in mind, this adjunct to the Rescue Randy eliminates strap pressure applied to the groin area of the Randy when harness straps pass through the manikin groin area. After the device is attached to the manikin thighs, the harness or waist strap that is passed through the groin during exercises will not hinder the structure of the manikin skeleton, which causes degradation of the pelvis. Use this inexpensive product to protect the investment you made in your Rescue Randy.

21541479

55.00

Water Rescue Training Manikin

Used by the U.S. Coast Guard, Sheriff's Departments, Lifeguard Trainers and Emergency Personnel for both on water and in water rescue and retrieval. Manufactured of durable vinyl plastic with rust resistant steel skeleton (adult and adolescent models). Articulated joints on Adult and Adolescent. When filled with water manikin will submerge to neck. Add an additional 5 - 10 lb weight (not supplied) to sink.

21541326	Adult	65 x 23 x 9"	52 lbs.	605.00

USAR-TECH Rope & Equipment Pack

A full backpack style equipment storage/carrier. Features a rope bag section with room for 200 ft. of 1/2" Access Lifeline **PLUS** space for a pre-rig rescue system. This feature is easily accessible without opening the main compartment. The main compartment features RescueTECH's exclusive "expanding compartment" storage system. The system effectively doubles the storage space for webbing, slings, and rope guards by placing a divider in the main compartment. Adjustable Shoulder and waist straps will accommodate all rescuers. Waist pads will actually expand to fit larger waists. The semi-rigid internal frame supports gear. All straps may be tucked into special storage areas to prevent tangling with other equipment in the compartment. Manufactured in our Georgia facility from fabric made from Dupont Cordura Brand fibers. Dimensions: 20"h x 18"w x 10"d.

Opening the divider reveals additional sling storage and mesh compartments for hardware and rigging supplies.

Rope and Pre-Rig Accessible from exterior through our rapid access opening

USAR-OPS Rope & Equipment Pack

A slightly smaller version of our popular USAR Rope and Equipment Pack, the Standard Rescue pack is durable and versatile. 4 interior mesh pockets securely hold small items. Outside 'slash' pockets and full width interior pockets give ample storage space for rope pads, slings and webbing. Horizontal strap system allows for attachment of pulleys and carabiners. Holds 150' of 1/2" rope and pre-rig in rope section. Padded shoulder straps and waist strap are comfortable and easily stowed for bag storage. Dimensions: 20"h x 16"w x 10"d.

USAR Task Force Member Pack

A Multi-Use Personal Equipment Pack

Designed at the request of a Southeastern USAR Team, the pack keeps Helmet, Class III harness, Carabiners, Webbing, Gloves, Accessory Cord, Goggles and other personal gear ready for deployment. Manufactured of High Strength Polyester fabric. Padded on all sides to protect contents. "D" rings on end accept shoulder straps. We can even fill it with the equipment that you need. Dimensions: 24 x 12 x 10"

29962101	USAR Member Pack	87.00
809790	Shoulder Strap	11.00

Mesh PFD Bag

The Mesh PFD Bag makes it easy to transport and store your damp and difficult-to-carry gear. The top of this bag is made with the same 2-1/2" square mesh netting so that everything inside dries quickly. The bottom is 500 denier PVC for durability. Two sturdy handles and a quick-cinch draw cord opening allow you to pick up and go. Room enough for all your friends' gear, too. Holds up to 18 PFDs. Dimensions: 40"W x 40"L x 30"H

20843094	80.00
----------	-------

RescueTECH Rescuer Gear Bag

We took the time to design a bag that a rescuer could keep personal gear ready to go. The main section has a zipper system that allow quick and full access to the contents. The large end pouch will hold an R3 Kiwi helmet, but can also be used for a change of clothes, harness, and other rescue items. The small end pouch works great for gloves, slings, etc. Side pockets hold other personal gear. A zippered see-through panel can be used for personal identification and allows the bag to be used and marked as a specific use rescue kit. Includes adjustable shoulder strap. Dimensions: 25 x 12 x 10". Color: Black

Equipment not included

809741	Black	90.00
809744	Red	90.00

Includes Shoulder Strap

RT Gear Bag

Heavy Duty Carrying Handles on Ends

A large Duffel design easily stores turnouts, helmet and boots. Great for all rescue personnel. The two-way wrap around zipper allows you to open bag all the way for easy access to contents. A large zipper pocket outside gives you extra storage for personal items, gloves, tools and goggles. Two inch webbed handles wrap completely around the bag to give extra support. Dimensions: 12" x 16" x 23". Color: Red. Weight: 1.5 lbs.

Equipment not included

Hall County SCBA Mask Bag™

After many months of searching and evaluation, Hall County Fire (Georgia) decided upon this design to protect their SCBA masks. Made of durable 1000d Cordura™ fit their needs to a "T". Closed with a durable #10 Zipper instead of Velcro™ for a long service life. Hall County chose to line the interior with a smooth, coated 200 denier nylon fabric instead of a fleece material. Their evaluations concluded that while the fleece was soft, it trapped dirt and contaminant in the material and between the inner and outer layer. Features a bottom grommet for drainage and a hook and loop strip to attach name plates or accountability tags. A durable 1" wide nylon webbing loop allows the bag to be attached to turnout gear or hooks in the apparatus or equipment lockers. Dimensions: 13.5" x 6.5"

8321014 Hall County SCBA Mask 23.00

Harness Rigging Pouch shown on Corona™ Escape Belt

Harness Rigging Pouch

A great addition to a rescuer's gear selection. The Rigging Pouch attaches to the waist belt of a rescue harness and provides quick access to often used equipment. Padded sides. Holds carabiners, slings, pulleys, etc. Easy access while "on rope". Locking Zipper prevents accidental opening. Inside features rigging loop and snap closure mesh pouch. Dimensions: 9.5 L x 7" H x 3" D. Weight: 11 oz.. Equipment not included.

800201 Harness Rigging Pouch 32.00

Harness Equipment Pouch

Our newest personal Harness Pouch. Designed to hold the many tools required by rescue technicians. The main pocket has a special collar closure that is secured with a cord lock. The front bellows pouch can hold quickly needed equipment. An exterior gear loop and mesh pocket multiplies the uses of this high quality bag. Dimensions: 8" L x 6.5" x 4.5" D. Weight: 12 oz.. Equipment not included.

800214	Red	34.00
800211	Black	34.00

Basic SCBA Mask Bag

A basic, envelope-style SCBA mask Bag. Made from highest quality 300 x 600 PVC coated nylon fabric for durability and water resistance. Full width hook and loop fastener keeps the contents clean and ready for use. Steel ring allows firefighter to attach this bag to turnout gear with a simple key-ring carabiner. Fits most mask-regulator style SCBA Masks (Scott®, Interspiro®, etc.) Color: Red. Bags may be ordered with embroidery (25 unit minimum). Call for details. Dimensions: 14" x 10" x 4".

8321015 Basic Mask Bag 16.00

Equipment and harness not included.

Lanyard Pouch

For lanyards, personal escape rope, gloves, and miscellaneous small equipment. Constructed of Cordura® nylon with fold over hook and loop closure. Built-in loops fit belts up to 4" wide. Holds 40 feet of 3/8" or 75 feet of 7mm nylon tag line or Titan Cord. Dimensions: 8" x 5" x 3". Color: Black. Weight: 2.4 oz.

800101 Lanyard Pouch 17.00

Equipment not included.

Deluxe Lanyard Pouch

Great for search kits. A larger version of our popular Lanyard Pouch. The Deluxe Lanyard Pouch features a "hinged" lid with a "hook and loop" closure. Holds up to 80 ft. of 8mm cord. Dimensions: 11" H x 7" W x 3" D. Color: Black, Orange. Weight: 3 oz.

Mustang HIT Inflatable PFD

Hydrostatic Auto-Inflation

For severe weather, no premature inflation, low maintenance. The Auto Hydrostatic Inflatable Personal Flotation Device (PFD) will only automatically inflate when submerged in 4 or more inches of water and not prematurely due to rain, spray or humidity. No inflator maintenance is required for 5 years unless the PFD has been inflated. Inflator status and replacement date viewed through the safety inspection window. Made for the most demanding users, constructed of durable 420-Denier nylon and heavy duty polyurethane coated nylon. Lightweight and comfortable, the PFD can be worn over a T-shirt or jacket. It is low profile and allows for the maximum amount of mobility. The neoprene Comfort Collar™ is so soft it won't chafe your neck. USCG Type V.

Rocket Fin

Quick-Release Strap

One of the first vented rubber fins available. Traditional all rubber design. Popular with military and professional divers.

2370621110

100.00

Shredder Rescue Fins

Fits over Swiftwater Rescue Boots

Ultra-Light technopolymer optimizes power with up to 50% less weight and bulk. Blade design improves thrust and reduces ankle and leg fatigue. Adjustable buckle with quick-release system secures fins even in swiftwater. Designed to fit all large dive / rescue style boots.

46005342	Yellow/Black	70.00
46005341	Black	70.00
46005349	Replacement Strap	15.50

Universal Rescue Fins

Designed to meet the demands of swiftwater rescue professionals, the Universal Swim Fins also work well for riverboarding and general river snorkeling. These rigid fins are symmetrical so they fit either foot. The wide heel strap is adjustable with a quick tug of the strap end, then you can unclip the strap and your adjustment stays put. The toe piece has a removable rigid insert that lets you select the stiffness you desire. The fins will fit over your river boots - just step in, click in the heel strap and you're ready to go!

Inflatable Rescue Board

The NRS Inflatable Rescue Board meets the tough demands of the swiftwater rescuer. Lightweight, stowable, versatile - it's built to last.

- Inflatable design is easy to stow and transport into the field.
- Top is made of rugged 840-denier urethane coated nylon for durability.
- Reinforced PVC bottom is slick and abrasion resistant. Sculpted design aids control and wave riding.
- Two inflated "skegs" add directional stability and control.
- The durable urethane bladder is inflated with a top quality Leaffield C-7 Valve.
- Two sets of heavy-duty handles assist the rescuer and victim.
- The 3" D-ring attachment on the nose is massively reinforced to take the strain of towing and lowering.
- Bright colors and large "RESCUE" lettering improve rescuer's visibility.
- Board is 30" W x 58" L

20841868 Inflatable Rescue Board 225.00

LifeSled®

PWC Towable Rescue Board

Designed for Ocean, Swiftwater and Ice Rescue where a towed board is essential. Severe-duty 3-point non-invasive hookup system with replaceable components. Over 450 lbs. of deadweight buoyancy. Ten fiber reinforced, tacky-when-wet handles are anchored internally. Stows "folded-over" PWC when not in use. Dimensions: 62" x 36" x 4.52". Weight 38 lbs.

351511	LifeSled	1,100.00
351503	Rescue Sled Storage Bag	105.00

Carlson Rescue Board

Lightweight & Maneuverable

For recreation or rescue. Solid Ethafoam with a slick bottom for performance and durability. (3-year warranty against delamination) Oversize Shipping Charges Apply. Color: Black

20841870 Carlson Rescue Board 410.00

Ring Buoy

USCG Approved

Unicell soft foam. Won't rot or water log. Diameter: 24". Complete with grab lines. Color: Orange.

Ice Anchor

Super Corrosion Resistant

Plated CrMo tubes with high strength hangers are the ideal anchor tool for Ice Rescue. Speed Grinder knob system makes placing these screws a breeze.

46001917	6.8" (17 cm)	47.00
46001922	8.8" (22 cm)	47.00

Rescue Tube

Yellow vinyl coating for great visibility and lightweight foam body for handling comfort. 3" x 36" with soft, nylon rope and one-piece body belt. USCG approved bronze snap hook.

460001	Rescue Tube, 40"	65.00
--------	------------------	-------

LSP Cinch Collar

Easy to use - The victim simply enters the harness with head and arms extended before tension is applied by the rescuer. The victim's weight will release the connector and allow the collar to cinch around him, preventing him from slipping out in the event he becomes unconscious. Durable-The interior of the Cinch is a non-absorbent, closed-cell foam. The outer covering consists of a tough, stain-resistant, washable Cordura which provides protection and comfort to the victim.

21542010	LSP Cinch	280.00
----------	-----------	--------

Wetsuit Shampoo

Complete, scientifically balanced maintenance system for all neoprene and water sports gear. Ideal for wetsuits, drysuits, boots and gloves, fishing waders, orthopedic supports, lycra body suits and more. Leaves neoprene articles free of organic residue, chlorine and salt deposits. Chlorine-removing agents and conditioners help prevent premature aging and oxidation.

20842249	Gallon	39.95
20842248	8 oz.	6.00

Rescue Can

Features hand grips that are secure and comfortable to grasp and help to calm a panicky swimmer. High visibility Bright Day-glow Orange color. Dimensions: 27.5 x 8.5 x 6". Weight: 4 lbs.

460005	Rescue Can	80.00
460006	Rescue Can, Max Flotation	85.00
460005R	Rescue Can Rack	50.00
460006R	Rescue Can Rack, Max Float	50.00

Zipper Lubricant

Lubricates and prolongs the life of zippers on wetsuits, drysuits and booties.

20842288	Zip Tech	6.50
----------	----------	------

Zipper Care

Zip Care is the ultimate zipper care for plastic, nylon or metal zippers. Unique push-pull brush top enables the cleaner to be delivered between the teeth and physically removes harmful dirt, sand, and salt deposits that can jam the zipper. Cleans drysuits and wetsuit zippers. Mild lubricant without silicone.

20842290	Zipper Care	5.00
----------	-------------	------

Dive Mask Training Blackout Cover

Finally, a reusable Diving Mask Cover that works. Made from tough, coated nylon fabric and elastic drawstring adjuster. Can be easily removed in an emergency situation. Excellent access to nose cup for clearing ears.

460101 Mask Blackout Cover 10.00

Sea Gold Anti Fog Gel

Rated BEST Anti-Fog by Rodale's SCUBA DIVING Magazine! The clear choice in anti-fog gels. Our unique clear formula means long lasting anti-fog protection. Sea Gold is highly concentrated and designed for quick, simple, in-field application. Sea Gold is safe for all glass and plastic lenses and will not harm surrounding silicone or rubber support frames. Not recommended for swim goggles.

238140851 Sea Gold, 1.25 fl oz. 5.50

Maui Dive Mask

Low volume, single window design. Black Silicone Skirt. Popular Mask for military and Professional divers.

2370503350 60.00

Seal Swim Mask

This is the mask that revolutionized the water industry by adding fit, functionality, and comfort to aquatic eyewear. Patented curved lens provides 180-degree peripheral vision without distortion. Dive quality silicone skirt provides a comfortable watertight fit. 100% UVA and UVB protection.

46010201	Clear Lens	34.00
46010209	Photochromic Lens	35.00

Military Flex Snorkel

Classic neoprene rubber design with flex tube. Used by military units worldwide for its versatility and performance. Ideal for rescue and recover dive teams. Includes keeper for mask strap.

23706930 17.25

Impulse 3 Flex Snorkel

Improved and streamlined. Patented Impulse Dry™ valve stops water from entering the snorkel. Large bore contoured barrel for unrestricted breathing. Self-draining purge valve for use when switching from scuba to snorkel. Pure soft silicone patented Comfo-Bite™ mouthpiece. Includes snorkel keeper.

4601053 Impulse 3 Snorkel 35.50

Aquaseal Wetsuit Repair Adhesive

The industry standard for maximum strength repairs to wetsuits, dry suits and all water sports products. Flexible urethane formula waterproofs, seals and protects against abrasion. Hundreds of water sports and household uses. Flexible Urethane formula that waterproofs, seals and protects against abrasion.

2282572 Aquaseal, 1 oz. Tube 7.00

Flammable - UPS ground only.

Training Weights

Rescue Diver training aid requirement. Solid rubber. For pool skills training for divers. 5" Donut rings may be used for assorted training exercises.

4600161	Block, 10 lb. (each)	45.00
4600162	Donut, 5 lb. (each)	12.00

Ankle Weights For Use with Drysuits

Fully adjustable length with quick-release buckle for safety. Neoprene. Sold in pairs. Color: Black

4600153 3 lbs., Pair 35.00

River Rescue Short Knife

Features quality 420 Stainless Steel 3" blade with serrated top edge for rope cutting, blunt chisel tip and line cutter. Molded Grip and sheath. Blade Shank protrudes past handle end to allow use as striking tool. Dimensions: 6.75 x 1.25" Weight: 4 oz.

6301200	Orange	24.00
6301202	Yellow	24.00
6301201	Black (not shown)	24.00

Dive Rescue Shears

Great for Rescue Diver Safety

EMT Shears in a Pouch that secures to BC Shoulder Strap or autoinflator hose. Includes Stainless Steel 7.5" EMT shears and adjustable pouch.

630111	Dive Rescue Shears	15.00
--------	--------------------	-------

WARNING

Tech Bags Include Reflexite™ retro-reflective stripes, Grab handles and Lightstick holders.
(Lightstick not included.)

All of our bags feature:

- Double Stitched Seams
- Reinforced Bottom Seams
- Quick-Adjust Bucket Handle
- Drawstring with Durable Cord-Lock
- Drainage Grommets

RESCUE STICK

Throwable Emergency Rescue Inflatable

Incredibly easy to use, the Rescue Stick™ provides rapid flotation assistance to a person at risk of drowning. Simply remove the baton shaped Rescue Stick™ from its waterproof bag and throw near the person. Once contact is made with the water it inflates in seconds to a large horseshoe shape keeping them afloat and their head above water until help arrives. Measuring only 14" in length and weighing 15.5 oz., the Rescue Stick™ is the most versatile rescue flotation device available. Easily stowed in a boat, vehicle, backpack or by the pool it will be accessible when and where you need it. The Rescue Stick™ is an invaluable tool for first responders to provide emergency flotation when no water rescue gear is available.

2049101	Rescue Stick	150.00
2049103	Rescue Stick, Training Model	75.00
2049105	Rescue Stick Rearm Kit	35.00

Pro-Poly™ Water Rescue Rope

100% Polypropylene

Kernmantle construction. Smooth sheath construction. Used in our Water Rescue Throwbags. Floats on top of water. Not recommended for rappelling or other heavy uses. Color: Yellow w/ Red & Blue Stripes

7/16" Water Rescue Rope

A special hybrid filament water rescue rope. Manufactured with a durable nylon sheath and a Multi-Filament Polypropylene core, this floating rope has a tensile strength of 5,000 lbf. Color: Yellow w/ Red Stripes and Yellow w/ Blue Stripes

8mm NFPA Throwline

UL Certified to NFPA 1983. Double braid construction of high strength core fibers covered in polypropylene to create a floating rope that meets the required strength specifications. Bright Yellow Color w/ Red Stripes.

3/8" Standard Poly Throwline

A throwline that gives rescuers an economic choice from the high-tech lines. Soft and easy to stuff and throw. 100% polypropylene solid braid.

CON-SPACE Communications Systems

Rescue Comm Kit 1

Configured for a team of five rescuers consisting of two primary entrants, two standby entrants and a safety attendant. Includes 100' of cable for each entrant (expandable to 1500 ft.). System can be configured for up to ten people using available modules and accessories. Weight: 49 lbs.

304011P Rescue Kit 1, Power Talk 8,000.00

Rescue Comm Kit 2

Configured for a team of four people consisting of two entrants, a safety attendant and a team leader. Includes 100' of cable for two entrants (expandable to 1500 ft.). System can be configured for up to ten people using available modules and accessories. Weight: 40 lbs.

304012 Con-Space Rescue Kit 2 6,000.00

Rescue Comm Kit 5

Configured for a team of six rescuers consisting of two primary entrants, two standby entrants and two attendants. Includes 100' of cable for each entrant (expandable to 1500 ft.). System can be configured for up to fourteen people using available modules and accessories.

304015P Rescue Kit 5, Power Talk 9000.00

Victim Locator Kit Confined Space Rescue Probe

For structural collapse - includes the unique CON-SPACE Rescue Probe designed to detect and communicate with victims trapped in collapsed structures. Intrinsically Safe Approved.

30310031 Victim Locator Kit 3,025.00

USAR Task Force Communication Kit

A multi-use Urban Search and Rescue Task force Kit designed to meet the needs of Confined Space, High Angle, Structural Collapse, Victim Location, Shoring, Tunneling and Trench Rescue. The USAR Kit can be configured according to the type of rescue involved, so whether it's a two-in-two-out or a five person Search and Rescue team this kit has you covered. Intrinsically Safe.

3034055 USAR Task Force Comm Kit 17,185.00

Bomb Disposal Kit

Private communications for team of 3 Bomb Specialists wearing Face Shields and Full Body Armor. System is NON-RF emitting - conforms to MIL-STD 461. Intrinsically Safe Approved.

30310030 Bomb Disposal Kit 3,800.00

RAMFAN UB20XX Extreme Hazard Blower

Same high quality blower mechanism as the standard UB20 with a conductive housing and duct. When properly grounded, the system virtually eliminates static discharges. Manufactured with Anti-Static housing. Totally enclosed hazardous location motor rated UL Class I, Group C,D; UL Class II, Group E,F, G. 30 ft. Cord w/ power switch. Plug not included. Blower Dimensions: 13"h x 12"w x 13"d. Blower Weight: 21 lbs.

3270115	UB-20XX w/ 15 ft duct AC	1,920.00
3270125	UB-20XX w/ 25 ft duct AC	2,057.00
3270102	UB-20XX Blower ONLY	1,375.00

Performance measured by CEESI.

UB20 Heater System

A complete system to warm your atmosphere. Produces 55,000 BTU's to easily heat confined spaces, tents, shelters, Decon Areas. System Includes: UB20 Blower, Heater Unit, 25 ft. of 8" duct, and LP regulator w/ 12 ft. LP Hose.

32037125	UB20 Heater System	3,023.00
----------	--------------------	----------

RAMFAN EF75 12" High Output Blower

RAMFAN combines aerospace fan design with high-strength polymers to produce a rugged high output portable blower for confined space and hazardous ventilation. Glass-reinforced Double Wall ABS housing handles the bumps and falls of the job site. UL listed motors. Advanced blade design increases head pressure and provides the power you need to meet difficult to ventilate conditions. Extreme Hazard Models constructed of carbon-reinforced ABS rated UL94HB. Resistivity: 100k ohm or less. Rated Class I, Group D, Class II, Group E, F, G. Supplied with junction box (no cord/no plug). Dimensions: 16" x 15" x 15". Weight: 38 lbs.

Technical Rescue Air Cart

Simultaneous Respirator and Air Tool Operation

Separate high (275 psi) and low (125 psi) pressure regulated air systems. Additional high pressure inlet port allows connection to outside air source for extended use applications. High pressure isolation valve and toggle switch allows user to switch between common or isolated air sources. Operable via cylinder air or mobile air truck. The system includes two connecting hose whips with bleed valves and inline check valves, adjustable heavy duty high flow pressure regulator with relief valve, dual pressure gauges for cylinder and outlet pressure readings, low cylinder pressure alarm, breathing air manifold with quick-disconnect Hansen couplings. 275 psi or 125 psi pressure relief valve. 3 way selector valve allows operation with left cylinder, right cylinder, or High Pressure Inlet. Dimensions: 35"H x 20.5" W x 15" D. Weight: 54.5 lbs (without cylinders). Respirator Regulator: 0 - 5500 psi inlet; 0 - 125 psi outlet. Tool Regulator, High Pressure: 0 - 6000 psi inlet; 0 - 275 psi outlet. Tool Regulator, Low Pressure: 0 - 300 psi inlet; 0 - 125 psi outlet. Flow Rate: 80 cfm @ 120 psi. Outlet Fittings: four (4) 1/4" Quick-Disconnect Fittings. Accepts cylinders up to 4500 psi pressure rating.

Spectrum Pressure Demand Airline Respirator With Escape cylinder

Complete low profile airline respirator to meet NIOSH requirements. Excellent visibility. Respirator includes: Full Facepiece, First and Second Stage Regulator Assembly, Harness Assembly with a 10 minute ESCBA cylinder. Add air supply hose and system constitutes a NIOSH Approved respirator. Excellent for work in confined space and IDLH environments.

Power Articulating Camera Head

Vision Stick™ Rescue Video System For USAR, Haz-mat and Fire Rescue

- * Forward Viewing
- * Power Articulation

- * Focus optimized for 3-4 feet
- * Fits easily into small diameter holes

Specifications

Camera	Color, 1/4" Sony Super HyperCAD™ Sensor
Head Diameter	1.5"
Sensitivity	0.5 LUX 380 TV Lines resolution
Illumination	High output white LEDs
Image Orientation	Variable, easily changed so image is always up right
Articulation	+/-90° Remote Power Articulation, controlled from ring on proximal end of probe. Direction indicator lamp indicates when unit head is in line with probe. Sealed Liquid tight for gasoline and aqueous liquids
Pole Lengths	5 ft. to 12 ft. (standard) 7.5 ft. to 20 ft. (special order)
Pole Construction	Fiber Glass with Quick Lock Cuffs.
Cabling	Internally wired probe. Short External coiled cable to Display / Power module avoids tangling. 5 ft. extension supplied.
Sound	Microphone located in LED Array. Earphones connected to display power module. (Included on "Sound" models only)
Display	3.5 LCD High Bright Monitor
Battery Life	2 Hours Continuous Use

Vision Stick™ Rescue Video Color / Thermal Imaging Color and Thermal Imaging Cameras on One Unit

One forward-viewing thermal imaging camera and one forward viewing color camera with white light illumination, integrated into a single camera head. The Vision Stick comes complete with an easy access control pad for viewing and control options. Electronic controls provide ability to control the power articulation of the camera head from the base of the pole. Built-in omni-directional microphone.

Length: Adjustable from 57" - 10'6".
Weight: ~4.3 lbs..
Head diameter: 2". head Length: 6.5".
Camera Articulation: 180° total (90° from center).

2375120 Vision Stick, Thermal/Color 19,692.00

SEARCHCAM 2000®

The entire system consists of: the probe, video monitor, headphones with boom microphone, sun shield, lanyard, two batteries, battery charger, field maintenance kit, operations and maintenance manual, and carry/storage case. The components are stored in one Pelican®, foam lined, high impact plastic, water and dust tight, carrying case with wheels. The packed unit weighs 59 pounds (26.8kg).

- High Resolution Color Camera
- Acoustical Search Microphone
- Speaker
- Variable Intensity Illumination
- Articulated Head
- Remote Control

21709920001	Probe	12,000.00

21709920101	Victim Simulator	230.00
-------------	------------------	--------

Shown with sunshield*

SearchCam Recon II®

The Recon II provides rescue squads with a general purpose camera system that is tailored to the task typically assigned to the rescue squad. The Recon II enables rescue squads to perform limited visual search through multiple debris layers, as well as victim observation after the Search Team has moved on to other locations. The Recon II is small enough to be easily maneuverable in the rubble, yet will extend long enough to be effective for multi-floor search operations. Effective viewing distance is as close as a few inches to over 10 feet (3 m) in total darkness. Compatible with all Searchcam 2000 accessories and batteries.

- Color Camera with DSP Color Control
- 5" LCD Detachable Display
- Integrated White LED Illumination
- 180 degree Manual Articulating Head
- Telescoping Probe (31" to 45")
- Lightweight: 4.5 lbs with Display
- Rechargeable Batteries with Minimum
- Run Time: Two Hours at Full Load
- Works with Searchcam 2000 Accessories

21709920101		7,000.00
-------------	--	----------

SearchCam SearchTIC® Thermal Imaging Camera

Full 5" display for large detail filled images. BlueLife™ image colorization displays skin temperatures in brilliant Blue to aide in rapid detection of victims. Integrated digital compass, displays viewing direction on-screen to assist in pinpointing a victim's location for rapid rescue. Digital zoom (2x) allows for detailed area search from a safe distance. Uses the new Lithium Ion rechargeable battery tube pack as well as disposable cells and the Searchcam belt pack battery system making the SearchTIC power compatible with hundreds of rescue teams around the world.

21709920201	SearchTIC	9,500.00
-------------	-----------	----------

Delsar Life Detector LD3

Rescue teams around the world have relied upon the LifeDetector for over 15 years to rapidly detect and locate victims of collapsed buildings. The LifeDetector essentially converts the entire collapsed structure into a large sensitive microphone to pinpoint signals from the entombed victims. The seismic and acoustic sensors of the system convert vibrations created by the live victim into audible and visual signals.

- Improved color-coded cable connectors
- Allows two acoustic search probes to be used simultaneously for stereo comparison.
- Audio loop record function records last five minutes of audio for playback and comparison.
- Display panel shows relative signal strength of all six sensors simultaneously. Peak meters indicates highest amplitude reached by each sensor.

UTD Quick Deploy System

UTD Camera w/ Handle

Vision Stick Under the Door (UTD)

The Vision Stick UTD system module is flat paddle camera, which will slide under a door to view what is on the other side. The system plugs into the Vision Stick monitor power supply. A handle is supplied with the system, which allows controlling the system while standing.

The Vision Stick UTD system has a 95° field of view which is off set 30° from the floor which allows viewing the whole room, including beside the door because of its long paddle. The paddle has been left a matte silver cover, since it is less obvious than black against most surfaces and tends to pick up the color of surrounding areas helping it avoid detection of use.

- The UTD Camera with handle is designed to be used as an accessory to the Vision Stick System - Monitor not included.
- The UTD Camera System includes camera, monitor, headphones and Handle.
- The UTD Quick Deploy system is a self-contained video and sound monitoring system. The System includes the UTD Camera, Handle, Headphones, Monitor, and Auxiliary Hole Camera.

2375208	Quick Deploy - IR / Color	12,308.00

Triage Belt

A unique belt designed for use within the start triage system. It utilizes four colors of survey tape to categorize patients.

The triage officer simply tears off a piece of colored tape and ties it around the patient's arm, which can be seen and understood from many yards away, unlike standard tags. The officer then tears a small piece of tape of the same color and placed in the side pouch of the belt. When done with the primary triage, the officer can check the contents of the pouch for an instant count of patients and their severity. Tape not included.

Tape not included

833100	Triage Belt	18.50
833115	Triage Tape (Green)	2.25
833112	Triage Tape (Yellow)	2.25
833114	Triage Tape (Red)	2.25
833111	Triage Tape (Black/White)	2.25

Equipment not included.

Command Board

The Accountability / Command board helps keep track of rescuers and organizes your incident command structure. It features an 18" x 24" dry erase board with the ICS structure screened on it. Includes velcro strip for name tags and twin flashlight harnesses to light the board. Manufactured from padded Ballistic nylon, pockets accommodate two radios or cell telephones and zippered pockets for clipboards, command vests, and writing utensils. The case will stand by itself or hang from a vehicle window or roof gutters to make a handy command station/table.

809801	Command Board	169.00

GX2003 4 Gas Monitor

3 Operating Modes

Built around high-quality micro-sensor personal 4-in-1 gas monitor with a built in sample pump.

Weight: 11 ounces

- 3 modes: Normal, Bar Hole, and Leak Check
- Monitors LEL, %volume methane, O₂, H₂S, CO
- Leak detect mode offers high sensitivity tests for ppm level natural gas leaks
- 0 to 100% volume Methane
- Auto-ranging display of %volume and %LEL
- Internal sample pump - 40' range
- Vibration, visual, and audible alarms
- Automatic backlighting during alarms
- Quick charge Ni-MH Battery (charge in 90 min.)
- High impact protective rubber boot
- Up to 600 hours of datalogging
- Autocalibration or single calibration
- TWA and STEL with lunch-break mode
- Intrinsically safe, CSA, C/US classified
- 2 year warranty

243227103 GX-2003, 115 VAC Charger 1,330.00

243227101 GX-2003, 12 VDC Charger 1,330.00

GX2001 4 Gas Personal Monitor

The smallest and most affordable 4-gas monitor in the world. Designed to give entrants immediate information on the confined space.

- Simultaneous detection of LEL/O₂/H₂S/CO
- Dimensions: 2.8" x 2.2" x 1.1"
- Weight: 6 oz
- Vibration alarm
- Alarm trend data
- Datalogging standard
- Autocalibration
- Ni-MH batteries recharge in 90 minutes
- Operates for up to 18 hours
- Large LCD display screen
- Automatic backlighting at alarm
- High impact, RFI shielded body
- STEL and TWA readouts
- Peak hold readouts
- Continuously displays current time
- Intrinsically safe, CSA, C / US approved
- 2 year warranty
- Includes Charger

2432233031 115vAC -Alligator Clip, 800.00

2432233011 12vDC - Alligator Clip 800.00

4" Nipple Model with GX2001 (Not Included)

RP-6 Pump

For GX2001 Four Gas Monitor

The RP-6 pump is housed in a rugged plastic case with quick connect fittings located on both ends of the unit. It is sold with either a 4" rubber nipple or with a 10' hose and probe. When buying the RP-6 with the 10' hose and probe, the probe is equipped with a dust filter and the 10' hose connects at the RP-6's quick connect inlet fitting. The inlet fitting of the RP-6 then connects to a removable clear plastic cup, which is a filter holder. This filter holder contains a dust and hydrophobic filter inside. The exhaust fitting of the RP-6, which is also a quick connect, connects to a coiled hose, which brings the sample to the GX-2001. The RP-6 will run for 5 hours from just 1 AA alkaline battery.

2432811166 10' Hose and Probe 380.00

GX2003 Kit

Calibration Kit

Complete calibration kits for our 4 gas instruments. Each kit contains 34 liter aluminum cylinder with H₂S (25ppm) / CO / CH₄ / O₂, Regulator, Case, and appropriate interface device for the instrument.

Kit shown with GX2001 (not included)

2432810301 GX2003 350.00

2432810101 GX2001 350.00

WARNING

Shown with HT-1250 Radio. Not included

Deluxe Radio Chest Harness

One-Size-Fits-All radio harness will adjust to hold any radio snugly to your chest. The vertical orientation of the radio improves reception, extends antenna life, and reduces the chance of chest injury during a fall. The unique suspension system of 1.5" webbing shoulder straps and elastic chest strap, virtually guarantees that the harness will not bounce or swing, even while crawling through confined spaces. Twin buckles ease the donning of the elastic chest strap. The harness features a large bellows cargo pocket, pen pouch, and twin elastic antenna keepers. ID Version includes a removable ID pocket with ID window. Weight: 9.1 oz. Color: Black.

Shown with HT-1250 Radio and Garmin V GPS. Not included

RescueTECH USAR Radio Chest Harness With Integral GPS Holder

The use of Radios and GPS units during natural disasters is a given. We found during the rescue operations following Hurricane Katrina, that existing radio chest harnesses did not meet the needs of rescue teams. We have updated our popular Deluxe Radio Chest Harness to include a see-through compartment for a Garmin V™ GPS, additional storage space, redesigned straps system, and many other features.

820325	USAR Radio Chest Harness	49.00
--------	--------------------------	-------

Shown with HT-1250 Radio. Not included

Double Radio Chest Harness

Same suspension and adjustment as the Deluxe Radio Chest Harness. Carries two radios, one on each side of platform with a center pocket for extra batteries, etc. Second radio pocket can also carry GPS unit or cell phone. Weight: 9.6 oz. Color: Black.

820321	Double Radio Harness	48.00
--------	----------------------	-------

Incident Command I.D. Badge Holder

Designed to hold I.D. Badges during Disaster Response. Safely stores permanent and temporary identification cards. Security pouches holds extra paperwork, currency, etc. Adjustable webbing neck strap. Water-resistant magna tuf fabric. Heavy duty polished clear vinyl allows I.D. Tags to be easily read by scene safety and security personnel. Pen / Penlight holder keeps items ready for instant access.

820201	ICS Badge Holder	14.00
--------	------------------	-------

I.D. Badge Attachment For Deluxe Radio Chest Harness.

Compact I.D. Attachment for the Rescue Tech Deluxe Radio Chest Harness or Double Radio Chest Harness. Made from the same high quality materials as our ICS Badge Holder. Pouch easily attaches to pouch closure system.

820205	ID Badge Attachment	8.00
--------	---------------------	------

Mini Q-4 Helmet Light

Fits Kiwi Light Pods

Extremely bright! Over twice as bright as premium lights of similar size. Provides 4 AA Batteries of power in a light approximating the size of lights containing only 2 AA batteries. Comfortably fits in pocket, briefcase, tool box, and other small places. Optional Helmet mounting brackets attach to industrial, fire, and climbing-style helmets. Burn Time 4-5 hours. Dimensions: 5.5" x 1 1.5" x 1" . Batteries included. FM Approved. Weight: 6.3 oz.

485342	Mini Q-4 Fire (YE)	27.00
485349	Spare Bulb for Mini Q-4	10.00

Tikka Plus

Adjustable proximity lighting with long burn time. Three lighting levels (maximum, optimum, economy) and a blinking mode. Ergonomically designed, comfortable elastic headband. Tilting lamp body. Long light duration up to 150 hours. Water-resistant for all-weather use. Uses 3 AAA/LR03 batteries (supplied). Weight: 78 gm including batteries.

235405472 Tikka Plus

34.95

MYO XP

The Petzl Myo XP is the newest light from Petzl. It features a single high-powered LED with 3 lighting levels. Provides a powerful, even and adjustable white light, with long duration. It is a single light for multiple uses. Powerful, focused light beam with 3 lighting levels (maximum, optimum, and economy) and a blinking mode, to adapt the light to the activity and as a function of light duration needs. "Boost" mode provides 50% more light than the maximum level for 20 seconds. Wide angle, flip-down, lens is included for flood beam like proximity lighting. Battery life indicator to warn when the batteries are 70% and 90% drained. Tilt-able light body. Switches are protected to help avoid accidental operation. Water resistance for all-weather use. Lighting distance of up to 45 meters (65 meters in boost mode). Light duration of up to 170 hours. 3 AA batteries (included) Weight: 175 grams with batteries.

23542083 Myo XP

79.95

Tikka XP / XP HazLoc

The Petzl Tikka XP is the newest light in the Petzl Tikka series of headlamps. Using one high powered LED this light is brighter than the 4 LED's found in the Petzl Tikka Plus light. Using a new high power focused LED light output will have three settings plus a 'boost' button producing a 50m beam when required. Other features include a tilting head, sliding diffuser for flood lighting and an LED battery level indicator. Includes a boost setting: (50m range) 20 second before reverting to previous setting. Light Duration: High: 60h; Medium: 80h; Low: 120h. 3 x AAA(included). HazLoc Model Rating: UL Class I, Div2, Group C,D. Weight with batteries: 95 grams.

EOS II LED

The EOS is optimized for both close-up and distance needs. The combination of a Luxeon/1 watt L.E.D. and a special lens maximizes the beam by balancing long throw with flood light. The EOS provides a self-contained 3AAA battery system that eliminates external wires, and is equipped with (3) brightness levels. Each level provides true current regulation ensuring that the EOS will remain at constant brightness as long as the batteries have sufficient voltage. Durable and water resistant to water. Weight: 3.7 oz with Batteries (Included). Waterproof to 1 Meter. Burn Time: High: 6.5 Hours; Medium: 12.5 Hours ; Low: 60 Hours.

899104G Instructor's Guide 47.50

Swept Away

Video Guide to Water Rescue Op's

A comprehensive rescue training film that has been specifically developed for emergency personnel who are called upon to respond to water emergencies. Swept Away provides an in-depth look at the essentials of water rescue and can serve as an invaluable training resource for both new and experienced emergency personnel. Running Time: 30 Minutes.

899520 Swept Away 49.00

Technical Rescue Operations Volume II

Common Emergencies

The second in a 3-volume series covers responding to, managing, and conducting rescues in the "daily" setting of fire/rescue agencies. This volume explains how to handle more complex and large-scale rescue operations that challenge responders to apply solid rescue principals for longer periods of time, with the assistance required of additional resources and under more strict command and control because of the scope of the incident, its newsworthiness, crowds of people arriving on the scene, and getting the immediate attention of local or regional elected officials.

899133 Technical Rescue Ops II 69.00

High Angle Rescue Techniques

3rd Edition

A textbook style publication that is designed to teach rope rescue techniques in a systematic manner. Step-by-step approach, full color text makes it easy to learn. Includes planning for an incident, managing a team, troubleshooting problems, operating equipment, and much more. Primarily written from a search and rescue point of view. 407 pages. Hundreds of Photos and illustrations. Includes handy Field Guide. Dimensions: 8.5 x 11".

899107 H.A.R.T. 53.95
899107G H.A.R.T. Field Guide 17.95

On Rope - 2nd Ed.

Excellent reference for those interested in single rope techniques. Written from a recreational point of view, it is nonetheless comprehensive and very informative. Contains large glossary of rope work terms and describes rappelling, ascending, and other techniques. Dimensions: 8.5 x 11".

899108 On Rope 32.00

Confined Space Rescue

by Chase Sargent

Bridges the gap between theory and practice. A comprehensive guide to hazardous atmospheres, detection equipment, breathing apparatus, ventilation, retrieval systems, backup teams, and operational procedures. Covers: Forming a Team, Planning, Training, Equipment, Command, Response, Entry & Rescue, and much more... 244 pages.

899112 Confined Space Rescue 39.00

Confined Space Rescue

by Browne / Crist

A complete text that focuses on confined space operations from hazard recognition to rescue operations. Explains hazards of confined spaces and integrating ICS into the rescue operation. Nine step process with checklists simplifies the toughest rescue operations. Case studies and real life examples. 204 pages.

899131 Confined Space Rescue 71.95

899131G Instructor's Guide 47.95

Confined Space and Structural Rope Rescue

The complete guide for technical rescue from man-made confined spaces and industrial environments. Covers all aspects of rescue operations. Topics include team development, rigging and hauling techniques, and hazard reduction and compliance issues. 384 pages, 200 illustrations. Dimensions: 8.5 x 11".

899118 Confined Space & Structural Rope Rescue 50.95

Technical Rescue Field Operations Guide

by Tom Pendley

Contains over 150 high quality graphic illustrations, command checklists, and easy to follow, step-by-step procedures for rope rescue, confined space rescue, swiftwater rescue, trench rescue, structural collapse rescue, and helicopter rescue. Dimensions: 4" x 6.5".

899120 Technical Rescue Op's Guide 19.95

Trench Rescue: Awareness, Operations, Technician, Second Edition

The most comprehensive textbook ever published on rescue operations in trench emergencies. Author C.V. "Buddy" Martinette covers everything from basic concepts of risk benefit to practical procedures for technician-level trench protective systems. The Second Edition includes current information on trench tools and equipment, PPE, rescue system preparation, types of collapse, hazard control, and more. The text includes up-to-date coverage of Trench Rescue Sections of NFPA 1670, NFPA 1006, and OSHA CFR § 1926 Subpart P, Excavations. The Second Edition now helps students make more effective use of class time by providing printed PowerPoint slides directly within the text.
